

3M Telecommunications  
Solutions for Networks

# Solutions for Enterprise Networks

Product Catalogue

**Dear Customer,**

In response to the increased demands made on the cabling infrastructure, the range of Enterprise Network Solutions products includes passive and active products for copper and fibre optic cabling systems for use in local area networks, data centres and campus networks for both data and telephony.

3M provides a broad range of support options for every stage of a system's life, including network design and project support, on-site assistance, certified installer training and advice on systems upgrades.

The components of 3M's systems feature innovative and high performance designs that offer the strong customer value that you would expect from a company that has more than 40 years experience of network design and product innovation.

Further information to our extensive products program and our achievements are on our Website: [www.3MTelecommunications.com](http://www.3MTelecommunications.com)

Sincerely,

3M Telecommunications Team

### Why Choose 3M?

The company is renowned for its commitment to research and development, so customers and partners can always be sure that 3M is at the leading edge of innovation, as well as the assurance that 3M has a strong focus on environmental issues and adhering to relevant legislation. 3M continues to follow the evolution of information technology and to develop high performance solutions which meet the increasing need for bandwidth. Employing some of the best experts in the industry, 3M has for many years worked closely with the industry associations tasked with creating international cabling standards.

Thanks to its network of branches in 80 countries in the world, 3M is in a position to offer both world class support and the understanding of local markets, including installer training, on site support and advice.

### Network Compliance

3M Enterprise Networks Solutions offer a complete range of products to support local area network and data centre applications over copper or fibre cabling., giving performance above the limits set by the standards ISO/IEC 11801, EN 50173 series and ANSI/TIA-568C series.

In addition 3M Volition™ copper components are independently certified by Delta for compliance to the component standards. See [www.madebydelta.com/](http://www.madebydelta.com/)

### 3M Enterprise Networks Solutions extended 25-year warranty

As such a crucial part of a company's communications system, customers need to be confident that their network will work to specification from commissioning to the end of its lifetime. 3M Telecommunications offers an extended 25-year warranty\* for the entire range of passive permanent link components in the Volition and Fibre Interconnect ranges that they will continue to perform to ISO/IEC 11801, EN50173 and TIA/EIA 568 standards in force at the time of installation. The warranty is extended through 3M partner installers and systems integrators who support the warranty in the field, backed by 3M technical support.

\*Terms and conditions apply.

3M Telecommunications is a Registered Developer in the Cisco Developer Network

3M Telecommunications is an HP AllianceOne Partner

# Copper Cabling Solutions

Copper Cabling Solutions include state of the art voice and data copper cabling system, including a range of Category 6A, Category 6 and Category 5e systems.

A variety of easy to install and innovative connectivity solutions ensure high performance, reliable systems. The 3M™ RJ45 copper products offer simple termination solutions – jacks snap on without tools – with built-in reliability features and component performance exceeding existing standards. The jacks are complemented by a range of cables, panels, outlets and patchcords to complete the installed link.

# 1. Copper Cabling Solutions

# Copper Cabling System - Features and Benefits

## Description

### Volition™ Copper Cabling System

- The Volition Copper Cabling system offers a complete range of products to support Ethernet applications over twisted pair. The Volition system gives electrical performance above the limits set by the standards ISO/IEC 11801, EN 50173 series and ANSI/TIA-568C series.  
The Volition Copper Cabling system offers a complete range of RJ45 jacks and sockets, cables, patch panels, patch cords and accessories. All the Volition components are designed to guarantee optimal performance as a complete system.

#### Standards

- ISO/IEC 11801
- EN 50173 series
- ANSI/TIA-568-C series

#### Applications

- IEEE 802.3ab 1000BASE-T
- IEEE 802.3an 10GBASE-T

### Volition™ 25-years Warranty

- 3M Telecommunications offers an extended 25-year warranty on the complete range of Volition components.

3M Telecommunications guarantees the electrical performance according to ISO/IEC 11801, EN 50173 series and ANSI/TIA-568-C series.

### Advantages of 3M Telecommunications

- 3M is renowned for its commitment to research and development and its sense of innovation. 3M Telecommunications has dedicated more than 40 years of study to designing and improving networks. The Volition™ solution is an innovation from 3M Telecommunications Laboratories. 3M continues to follow the evolution of information technology and to develop high performance

solutions which meet the increasing need for bandwidth. Thanks to its network of branches in 60 countries in the world, 3M is in a position to offer world class service support on three levels: certified installation training, assistance with the design of networks and on-site assistance with installation.

### Volition™ RJ45 Keystone Jacks

- The RJ45 Keystone jacks have been specifically developed for Gigabit and 10 Gigabit Ethernet applications, according to ISO/IEC 11801, EN 50173-1, EN 60603-7 series and TIA/EIA 568C. Their patented design allows an easy, tool-less

termination, and makes them leading products in the market.

The keystone format gives compatibility with many standard faceplates and adapters.

#### Features

- Tool-free assembly
- Built-in dust shutter which closes automatically
- Easily reusable
- Insulation displacement connections compatible with solid and stranded cables
- Cable entry from top or bottom
- Versions: UTP, FTP and STP with 360° shield
- STP version: Total 360° coverage of cable shield by metallic braid

#### Advantages

- Connection quality is independent of the quality of tools or labour
- Immunity to dust on both patch panels and terminal outlets
- No waste in the case of cabling errors
- Consolidation point assembly with patch cables
- Easier accommodation of cable minimum bend radius
- Compliance with different EMC requirements
- STP version: Excellent transfer of impedance for immunity against electromagnetic disturbances

## Copper Cabling System - Features and Benefits

### Volition™ RJ45 sockets and faceplates

---

- Volition faceplates are available in many different formats, according to the most important national standards.

#### Features

- Available types: France, Germany, Italy, UK, USA
- Built-in dust shutter in the RJ45 jack
- Shallow depth of the jack and choice of cable entry
- Compatibility with UTP, FTP and STP RJ45 jacks

#### Advantages

- Integration with many standards
- Immunity to dust on terminal outlets
- Compatibility with many types of boxes and frames
- Compliance with different EMC requirements

### Volition™ Cables

---

- Volition™ Cables allow easy termination to the RJ45 jacks. The cables are available in unshielded

and shielded versions, 4 pairs and 2x4 pairs, with PVC or LSOH (Low Smoke Zero Halogen) jacket.

### Volition™ Patch Panels

---

- Volition patch panels are modular and can accommodate up to 24 RJ45 ports in one unit of rack space (1U). Their modular design makes them easy to install on site in 19" racks.

All Volition patch panels have an earth stud which permits continuity of earth with the FTP or STP RJ45 K series jacks.

### Volition™ certificates of compliance

---

- Certification by an independent laboratory is a proof of the quality and reliability of the Volition™ range.
- 3M is using world-class laboratories for its certification.
- The Category 6<sub>A</sub> and Category 6 systems are certified by the external laboratory Delta.

- The 3M certificates are updated annually and can be downloaded from the web site [www.delta.dk](http://www.delta.dk).

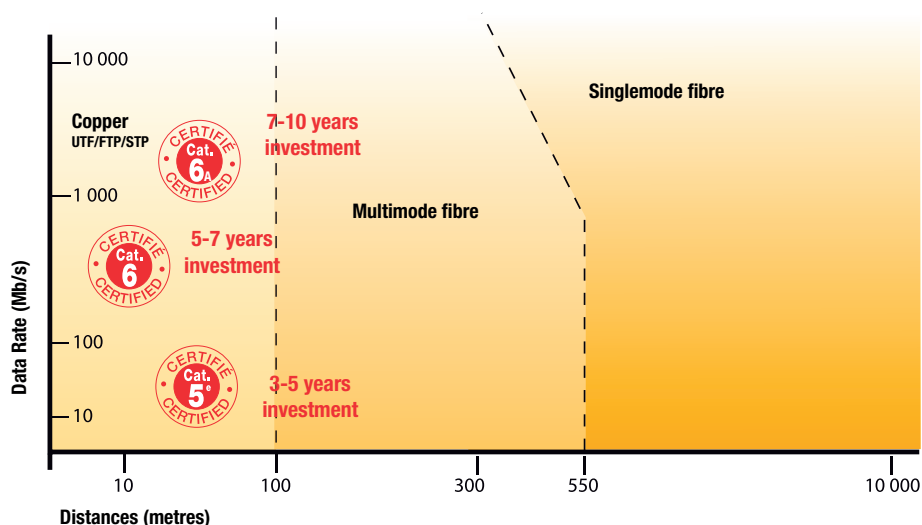

**Note:** In international and European standards copper components are classified in Categories and links are classified in Classes. In USA standards the term Category is used for both copper components and links.

In international and European standards Category 6<sub>A</sub> and Class E<sub>A</sub> are written with subscript A whereas in USA standards an uppercase A is used - Category 6A.

# Copper Cabling Selection Guide

| Version | U/UTP Cat.5e | F/UTP Cat.5e | U/UTP Cat.6 | F/UTP Cat.6 | F/UTP Cat.6 <sub>A</sub> | F/FTP Cat.6 <sub>A</sub> | S/FTP Cat.6 <sub>A</sub> |

| Cables  | U/UTP        | F/UTP        | U/UTP       | F/UTP       | F/UTP Cat.6 <sub>A</sub> | F/FTP Cat.6 <sub>A</sub> | S/FTP Cat.7              |
| Cords   | U/UTP        | F/UTP        | U/UTP       | S/FTP       | S/FTP                    | S/FTP                    | S/FTP                    |
| RJ45    | UTP          | FTP          | UTP         | FTP or STP  | STP                      | STP                      | STP                      |
| Class   | D / 1 Gb/s   | D / 1 Gb/s   | E / 1 Gb/s  | E / 1 Gb/s  | E <sub>A</sub> / 10 Gb/s | E <sub>A</sub> / 10 Gb/s | E <sub>A</sub> / 10 Gb/s |

## Category 5e

- Volition™ Category 5e solution (standard bandwidth up to 100MHz) supports up to 1Gb/s Ethernet for businesses with a short-medium term

investment strategy in the infrastructure and with a limited demand for high-speed voice-video-data applications.

## Category 6

- Volition™ Category 6 solution (standard bandwidth up to 250 MHz) offers a larger bandwidth than Category 5e and supports up to

1Gb/s Ethernet with higher efficiency and throughput for those businesses with a medium-term investment strategy in infrastructure.

## Category 6<sub>A</sub>

- Volition™ Class E<sub>A</sub> / Category 6<sub>A</sub> solution supports up to 10G Ethernet according to the 10GBASE-T standard. It is ideal for businesses with a long-term investment strategy and with a fast evolution in network application requirements.
- The Volition™ Class E<sub>A</sub> / Category 6<sub>A</sub> solution offers double the bandwidth (500 MHz) compared with Class E / Category 6 and a unique integral reduction of alien crosstalk (AXT).

- AXT is all the electrical noise created on a cable or an RJ45 jack by neighbouring cables and jacks. The number one noise source in 10GBASE-T is AXT, the effects of which disturb not only the cables, particularly in the cable routes, but also the RJ45 jacks, especially in patching racks where there are many adjacent links.

## Copper Cabling Selection Guide

### LAN Cable Naming Scheme

- The naming conventions of LAN cables are published in Annex E of ISO 11801.
- All the designations have the format: **ZZ/XTP**
- **TP** = Twisted Pair

#### Naming Scheme of 3M LAN cables

| 3M Name | ISO 11801 Name |
|---------|----------------|
| UTP     | U/UTP          |
| FTP     | F/UTP          |
| SFTP    | SF/UTP         |
| FFTP    | F/FTP          |
| SSTP    | S/FTP          |

- ZZ** = general protection of the cable
- U** = Unshielded
- F** = Foil screen (made from aluminium/polyester foil)
- S** = Braid screen (made from copper braid)
- SF** = Braid and foil screen (made from braid + aluminium/polyester foil)
- X** = protection of the individual pairs
- U** = Unshielded
- F** = Foil screened (screen made from aluminium/polyester foil)

| Category/Class      | Cable     |            |              | 3M Connector | Alternative |            |
|---------------------|-----------|------------|--------------|--------------|-------------|------------|
|                     | Structure | No. pairs  | 3M Reference | Type         | Recommended | Version    |
| Cat.5e/<br>Class D  | U/UTP     | 4          | VOL-5EUL4    | KSE          | VOL OCK5EU  | -          |

# 1.1 Volition™ Class E<sub>A</sub> / Category 6A Cabling System

## Description - Class E<sub>A</sub> / Category 6A cabling system

### Category 6<sub>A</sub> extended to 500 MHz

- In less than 10 years, the speed of local area networks (LAN) has gone from less than 10 Mb/s to several Gigabits per second. Market specialists foresee LAN requirements accelerating and a progression in bandwidth for the horizontal cabling which is traditionally a copper system. The 10 Gb/s Ethernet standard (10GBASE-T) for twisted pair copper cabling is a now a reality. New revisions of international standards on cabling systems ISO/IEC 11801, EN 50173 series and ANSI/TIA-568-C series define Class E<sub>A</sub> and Category 6A cabling which both offer a bandwidth of 500 MHz.
- These developments mean that companies are now able to install a high-speed fibre optic backbone and migrate towards higher speed copper cabling in the horizontal. Many LAN administrators plan to install high performance copper cabling systems which make it possible to support both present and future applications. Also Class E<sub>A</sub> / Category 6A cabling is increasingly used in data centres where higher speeds are essential.
- Volition Network Solutions from 3M comply fully and economically with the advances in copper cabling standards.

### 10 Gigabit per second copper cabling technologies

- The IEEE 802.3an group chose a maximum frequency of 500 MHz which doubles the frequency range of the original Class E / Category 6 specified up to 250 MHz. The IEEE group also defined a new electrical parameter for the channel which is "alien cross talk" (AXT). AXT is all the electrical noise created on a cable or an RJ45 jack
- by neighbouring cables and jacks. The number one interference in 10GBASE-T is AXT, the effects of which disturb not only the cables, particularly in the cable routes, but also the RJ45 jacks, especially in patching racks where there are many adjacent links.

### Volition Class E<sub>A</sub> / Category 6A Solution

- Volition Class E<sub>A</sub> / Category 6A cabling system is designed in compliance with the most recent ISO/IEC, European and TIA standards for Channel and Permanent Link configurations. The Volition Class E<sub>A</sub> / Category 6A Solution is differentiated by the unequalled reduction of the effects of AXT over the
- entire channel. The solution comprises a complete range of new RJ45 jacks, new twisted pair copper cables, 19" patch panels and new RJ45 patch cables. The Volition Class E<sub>A</sub> / Category 6A solution fully meets the requirements of a 10 Gb/s local area network infrastructure.

### RJ45 Volition K6A jack

- The RJ45 Volition K6A jack has been specially developed for Class E<sub>A</sub> and Category 6A systems on twisted pair cable in compliance with the standards ISO/IEC 11801, EN 50173 series and ANSI/TIA-568-C for channel and permanent link configurations. With its patented design, it can be connected to Volition Category 6A cables
- without any special tools. The 360° connection to the cable shield, thanks to the metallic braid of the cover, is a unique, method of cabling. The 360° shield acts like a Faraday cage around the RJ45 Volition K6A jack, giving unrivalled immunity against alien cross talk.

### Volition™ RJ45 faceplates

- Volition faceplates are available in many different formats, according to national standards.

## 1.1 Volition™ Class E<sub>A</sub> / Category 6A Cabling System

### 3M™ Volition™ Category 6<sub>A</sub> / Category 7 cables

- The Volition Category 6<sub>A</sub> and Category 7 cables have been specially developed to ensure excellent immunity against AXT up to 500 MHz (for Category 6<sub>A</sub>) and 600 MHz (for Category 7). All cables of Volition design have a general shield and/or screen per pair. Volition cables benefit from unequalled immunity to AXT. The cables have independent performance verification from Delta. Volition cables are easy to install and do not require any special installation precautions. Connection to the Volition K6A RJ45 jack remains simple and familiar. Pulling in the cables is easy, due to the fact that their outer dimensions are very close to the current Volition Category 6 cables. Volition cables have LSOH (Low Smoke Zero Halogen) sheath.
- Comparative studies show that competing Category 6<sub>A</sub> UTP cables have outer diameters larger than those of current Category 6 cables or are a non-round shape. Cabling techniques to reduce AXT between 10 Gb/s UTP cables consist of moving the pairs further apart, strengthening the outer sheaths, placing an insulator or separator between the pairs and increasing the twist. The outer diameter of Category 6<sub>A</sub> UTP cables is thus increased. Another technique consists of making Category 6<sub>A</sub> UTP cables oval to reduce the risk in cable routes of one pair being adjacent to another pair with the same twist. This makes the cables harder to install and the cable bundles larger.

### Features

- Category 6<sub>A</sub> cable with round design
- General shield and/or screen per pair
- Metric markings on exterior sheath

### Advantages

- Easy to terminate with RJ45 Volition K6A jacks
- Unequalled protection against AXT
- Makes it easier to manage the installation

### Volition patch cables

- Volition patch cables have been specially designed to give excellent immunity against AXT up to 500 MHz, in particular to reduce the effect of AXT in patching racks where there are many adjacent links. Volition patch cables have a general braid and a screen per pair. Volition patch cables are available with LSOH (Low Smoke Zero Halogen) sheath.

### Volition patch panels

- Volition patch panels are modular and can accommodate up to 24 RJ45 ports in one unit of rack space (1U). Their modular design makes them easy to install on site in 19" racks. All Volition patch panels have an earth stud which permits continuity of earth with the RJ45 K6A jacks.

## 1.1 Volition™ Class E<sub>A</sub> / Category 6A Cabling System

### Volition RJ45 Faceplates

- Available in many different formats compatible with Category 6<sub>A</sub> RJ45 jacks
- Have automatic dust shutter when fitted with a jack
- Low depth when fitted with a jack

# 1.1 Volition™ Class E<sub>A</sub> / Category 6A Cabling System

## Volition RJ45 K6A STP keystone jack

- 360° Metallic shielding
- Tool-less termination
- Re-usable jack
- Connector can be terminated with both solid and stranded wires
- Integral shutter
- Separate wire guide indicating the contact number and the wiring codes TIA 568A and TIA 568B

### Ordering Information

- 1 – Conductor material: copper wire Ø 0.56 mm (23AWG)
- 2 – Insulation material: Coloured polyethylene Ø 1.45 mm
- 3 - Number of pairs: 4 and 8 (2x4)
- 4 – Individual screen on each pair: Aluminium/Polyester foil
- 5 – General screen: copper braid
- 6 – Jacket material: LSZH

##### Electrical characteristics at 20°C

- Complete conductor resistance:  $\leq 146.4 \text{ W / km}$
- Insulation resistance (500V):  $\geq 5000 \text{ MW / km}$
- Dielectric strength at 50 Hz 1 kVdc / 1 min (no breakdown)
- Capacitance unbalance – pair to ground:  $\leq 1600 \text{ pF / km}$
- Propagation velocity (NVP): 78%
- Characteristic Impedance at 100 MHz:  $100 \pm 5 \text{ W}$
- Transfer impedance at
  - 1 MHz  $> 10 \text{ mW / m}$
  - at 10 MHz  $> 10 \text{ mW / m}$
  - at 30 MHz  $> 20 \text{ mW / m}$
  - at 100 MHz  $> 30 \text{ mW / m}$

##### Mechanical installation characteristics

- Minimum bend radius (installation): 60 mm
- Minimum bend radius (installed): 30 mm
- Temperature range (°C)
  - Transport / storage / installation: 0 to +50°C
  - Service: -20 to +60°C

# 1.1 Volition™ Class E<sub>A</sub> / Category 6A Cabling System

## Technical Specifications

### Category 6<sub>A</sub> F/FTP LSZH cable

#### Cabling standards

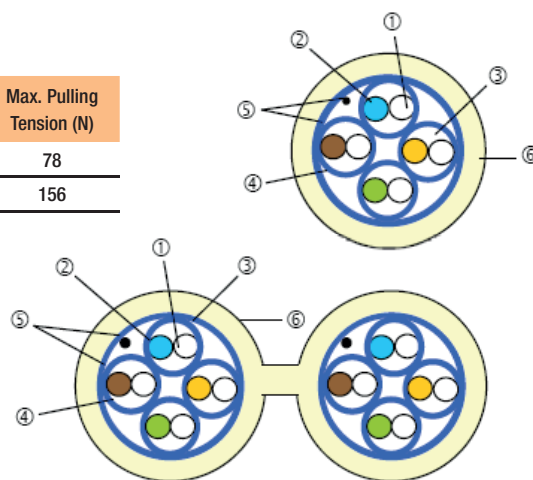

- EN 50173
- ISO/IEC 11801
- ANSI/TIA-568-C
- EN 50288-10
- IEC 61156-5

#### Environmental characteristics (LSZH)

- Flammability performance IEC 60332-1
- Smoke emission IEC 61034
- Toxicity/acid gas IEC 60754-1/-2

| Type | Colour | Max. Diameter | Weight | Fire loading | Max. Pulling Tension (N) |
|------|--------|---------------|--------|--------------|--------------------------|
|      |        | mm            | kg/km  | MJ/Km        |                          |
| 4P   | Green  | 7,70          | 58     | 626          | 78                       |
| 2x4P | Green  | 7,90x16,00    | 117    | 1 301        | 156                      |

- 1 – Conductor material: copper wire Ø 0.56 mm (23AWG)
- 2 – Insulation material: Coloured polyethylene Ø 1.45 mm
- 3 - Number of pairs: 4 and 8 (2x4)
- 4 – Individual screen on each pair: Aluminium/Polyester foil
- 5 – General screen: Aluminium foil with copper drain wire
- 6 – Jacket material: LSZH

#### Electrical characteristics at 20°C

- Complete conductor resistance (maxi): ≤ 146.4 W / km
- Insulation resistance (500V): ≥ 5000 MW / km
- Dielectric strength at 50 Hz 1 kVdc / 1 min (no breakdown)
- Capacitance unbalance – pair to ground: ≤ 1600 pF / km
- Propagation velocity (NVP): 78%
- Characteristic Impedance at 100 MHz: 100 ± 5 W
- Transfer impedance at
  - 1 MHz > 30 mW / m
  - at 10 MHz > 30 mW / m
  - at 30 MHz > 50 mW / m
  - at 100 MHz > 100 mW / m

#### Mechanical installation characteristics

- Minimum bending radius (installation) 70 mm
- Minimum bending radius (installed) 35 mm
- Temperature range (°C)
  - Transport / storage / installation: 0 to +50°C
  - Service: -20 to +60°C

## Electrical performance

# 1. Copper Cabling Solutions

## 1.1 Volition™ Class E<sub>A</sub> / Category 6A Cabling System

### Technical Specifications

#### S/FTP LSOH reduced diameter cable

- 3M™ Volition™ S/FTP Small Diameter Cable has been specifically designed to provide performances and higher density in data centre applications, as well as offering a low 'Eco-Profile' and cost effectiveness.

**VOL-DCSFL4 cable, when associated with 3M K6AS and 3M K6ASE RJ45 Jacks, provides compliance with Category 6A/Class E<sub>A</sub> performance in permanent link up to 65 m and in channel up to 70m.**

#### Environmental characteristics (LSZH)

- Flammability performance IEC 60332-1
- Smoke emissions IEC 61034
- Toxicity/acid gas IEC 60754-1/-2

| Type | Colour | Max. Diameter | Weight | Fire loading | Max. Pulling Tension (N) |
|------|--------|---------------|--------|--------------|--------------------------|
|      |        | mm            | kg/km  | MJ/Km        |                          |
| 4P   | Green  | 5,60          | 37     | 626          | 45                       |

1. Conductor Diameter: 0.40 mm (AWG 26)
2. Insulation Diameter: Pe < 0.95 mm
3. Cable assemblies: pairs
4. Individual Screen around pairs: Alu/Polyester tape conductor
5. Shield: Copper braid
6. Sheath material: LSOH  
Colour: green

#### Electrical characteristics at 20°C

- Complete conductor resistance (maxi): ≤ 300 Ohm / km
- Insulation resistance (500V): ≥ 5000 MOhm / km
- Dielectric strength at 50 Hz 1 kVdc / 1 min (no breakdown)
- Capacitance unbalance – pair to ground: ≤ 1600 pF / km
- Propagation velocity (NVP): 78%
- Characteristic Impedance at 100 MHz: 100 ± 5 Ohm
- Transfer impedance at 1 MHz > 10 mOhm / m  
at 30 MHz > 20 mOhm / m  
at 100 MHz > 30 mOhm / m

#### Mechanical installation characteristics

- Minimum bending radius (installation) 45 mm
- Minimum bending radius (installed) 25 mm
- Temperature range (°C)  
- Transport / storage / installation: 0 to +50°C  
- Service: -20 to +60°C

### Electrical performance

| Frequency (MHz)          | 4    | 10   | 100  | 250  | 600  | 900* |
|--------------------------|------|------|------|------|------|------|
| Max Attenuation (dB/70m) | 3.4  | 5.7  | 18.5 | 29.4 | 47.8 | 58.2 |
| Min NEXT (dB)            | 83   | 83   | 77   | 72   | 66   | 63   |
| PS NEXT (dB)             | 80   | 80   | 74   | 69   | 63   | 60   |

## 1.2 Volition™ Category 6 Cabling System

### Volition™ - Category 6/Class E cabling system

- The Volition Copper Cabling system offers a complete range of products to support Gigabit Ethernet applications over twisted pairs, according to Ethernet standard IEEE 802.3 (1GBASE-T). Volition Solutions provide electrical performance above the limits set by the standards ISO/IEC 11801, EN 50173 series and ANSI/TIA-568-C in permanent link, up to 90 m with 4 Volition™ RJ45 K6 jacks and Volition™ Category 6 cable, if installed according to the Volition™ Planning and Installation Guide.
- Volition Copper Cabling system offers a complete range of RJ45 jacks and sockets, cables, patch panels and patch cords. All the components of Volition are designed to guarantee optimal performance as a complete system.
- Volition™ Category 6 solution (standard bandwidth up to 250 MHz) offers a larger bandwidth than Category 5e and supports up to 1G Ethernet with higher efficiency and throughput for those businesses with a medium-term investment strategy in infrastructure.

#### Selection Guide Volition™

| Version | U/UTP Cat.6 | F/UTP Cat.6 | S/FTP Cat.6 |
|---------|-------------|-------------|-------------|
| EMC     | Low         | Medium      | High        |
| Cables  | U/UTP Cat.6 | F/UTP Cat.6 | S/FTP Cat.7 |
| Cords   | U/UTP       | S/FTP       | S/FTP       |
| RJ45    | UTP         | FTP         | STP         |
| Class E | 1 Gb/s      | 1 Gb/s      | 1 Gb/s      |

#### Volition™ RJ45 Jacks

- The RJ45 Volition jacks have been specially developed for Ethernet applications up to 1Gb/s, according to ISO/IEC 11801, EN60603-7 series and ANSI/TIA-568-C. With their patented design, they can be connected to Volition cables without any special tools.

## 1.2 Volition™ Category 6 Cabling System

### Volition™ RJ45 sockets and faceplates

---

- Volition faceplates are available in many different formats, according to the most important national standards (France, Germany, Italy, UK, USA) and are compatible with UTP, FTP and STP RJ45 jacks.

### Volition™ Cables

---

- Volition™ Cables allow easy termination to RJ45 jacks. The Volition™ Category 5e and Category 6 cables are available in U/UTP and F/UTP versions, with PVC and LSZH (Low Smoke Zero Halogen) jacket.

### Volition™ Patch Cords

---

- Volition™ patch cords are designed to ensure electrical performance above ISO/IEC 11801, EN 50173 series and ANSI/TIA-568-C in channel configuration. The Volition™ Category 5e and Category 6 patch cords are available in unshielded and shielded versions, with PVC or LSZH (Low Smoke Zero Halogen) jacket.

### Volition™ Patch Panels

---

- Volition patch panels are modular and can accommodate up to 24 RJ45 ports in one unit of rack space (1U). Their modular design makes them easy to install on site in 19" racks. All Volition patch panels have an earth stud which permits continuity of earth with RJ45 FTP or STP jacks.

## 1.2 Volition™ Category 6 Cabling System

### Volition RJ45 Faceplates

- Available in many different formats compatible with Category 6 RJ45 jacks.
- Have automatic dust shutter when fitted with a jack
- Low depth when fitted with a jack

### Volition RJ45 K6 keystone jack

- Tool-less termination
- Re-usable jack
- Connector can be terminated with both solid and stranded wires
- Integral shutter
- Separate wire guide indicating the contact number and the wiring codes TIA 568A and TIA 568B
- IP50
- UTP – coloured jacks available
- Bulk packaging available

### Volition RJ45 19" Patch Panels for K6 Jacks

- Modular patch panel for RJ45 keystone jacks
- Delivered without connectors
- Can be equipped with Volition RJ45 K6 Jacks
- Direct and individual earthing protection upon insertion of jacks (FTP and STP)
- Delivered with screws and cage nuts
- Compatible with the RJ45 splitter locking system (Type CBV in 16 and 24 ports versions in black)

## 1.2 Volition™ Category 6 Cabling System

### Volition RJ45 patch cords

- Compliant with Category 6 hardware performance, certified by Delta
- These cords allow the implementation of Class E ISO/IEC Channel and Category 6 TIA Channels at 250 MHz
- Round cable
- Moulded boot
- Straight wiring
- PVC or LSOH jacket
- Standard colour: turquoise

- 1 – Conductor material: copper wire Ø 0,535 mm (24AWG)  
 2 – Insulation material: Polyethylene Ø 1,10 mm  
 3 – Pairs: 4 and 8 (2X4)  
 4 – Cross separator  
 5 – Tape – Synthetic  
 6 – Alu/polyester tape and copper drain wire  
 7 – Jacket material: LSZH or PVC  
 Colour: green

##### Electrical characteristics at 20°C

- Complete conductor resistance (max): ≤ 190 Ohm / km
- Insulation resistance (500V): ≥ 5000 MOhm / km
- Dielectric strength at 50 Hz 1 kVdc / 1 min (no breakdown)
- Capacitance unbalance – pair to ground: ≤ 1600 pF / km
- Propagation velocity (NVP): 78%
- Characteristic Impedance at 100 MHz: 100 ± 5 W
- Transfer impedance at
  - 1 MHz > 40 mW / m
  - 10 MHz > 40 mW / m
  - 30 MHz > 50 mW / m
  - 100 MHz > 200 mW / m

##### Mechanical installation characteristics

- Minimum bend radius (installation): 60 mm
- Minimum bend radius (installed): 30 mm
- Temperature range (°C)
  - Transport / storage / installation: 0 to +50°C
  - Service: -20 to +60°C

### Electrical performance

# 1. Copper Cabling Solutions

## 1.2 Volition™ Category 6 Cabling System

### Technical Specifications

#### Volition Category 6 U/UTP LSZH and PVC cable

##### Cabling standards

- EN 50173
- ISO/IEC 11801
- TIA/EIA 568
- EN 50288-6-1
- IEC 61156-5

##### Environmental characteristics (LSZH)

- Flammability performance IEC 60332-1
- Smoke emissions IEC 61034
- Toxicity/acid gas IEC 60754-1/-2

| Type       | Colour | Max. Diameter | Weight | Fire loading | Max. Pulling Tension (N) |
|------------|--------|---------------|--------|--------------|--------------------------|
|            |        | mm            | kg/km  | MJ/Km        |                          |
| 4P         | Green  | 6,00          | 38     | 468          | 95                       |
| 2x4P       | Green  | 6,0x18,1      | 90     | 1197         | 180                      |
| 4P (PVC)   | Green  | 6,60          | 37     | 518          | 95                       |
| 2x4P (PVC) | Green  | 6,0 x 19,6    | 97     | 1561         | 180                      |

- 1 – Conductor material: copper wire Ø 0,56 mm (23AWG)
- 2 – Insulation material: Polyethylene Ø 0,98 mm
- 3 – Pairs: 4 and 8 (2X4)
- 4 – Cross separator
- 5 – Jacket material: LSZH or PVC  
Colour: green

##### Electrical characteristics at 20°C

- Complete conductor resistance (max): ≤ 190 Ohm / km
- Insulation resistance (500V): ≥ 5000 MOhm / km
- Dielectric strength at 50 Hz 1 kVdc / 1 min (no breakdown)
- Capacitance unbalance – pair to ground: ≤ 1600 pF / km
- Propagation velocity (NVP): 66%
- Characteristic Impedance at 100 MHz: 100 ± 5 W

##### Mechanical installation characteristics

- Minimum bend radius (installation): 50 mm
- Minimum bend radius (installed): 25 mm
- Temperature range (°C)
  - Transport / storage / installation: 0 to +50°C
  - Service: -20 to +60°C

## 1.3 Volition™ Category 5e Cabling System

### Description - Category 5e/Class D cabling system

- The Volition Copper Cabling system offers a complete range of products to support Gigabit Ethernet applications over twisted pairs, according to Ethernet standard IEEE 802.3 (1GBASE-T). Volition Solutions provide electrical performance above the limits set by the standards ISO/IEC 11801, EN 50173 series and ANSI/TIA-568-C in permanent link, up to 90 m with 4 Volition™ RJ45 K5e jacks and Volition™ Category 5e cable, if installed according to the Volition™ Planning and Installation Guide.
- Volition Copper Cabling system offers a complete range of RJ45 jacks and sockets, cables, patch panels and patch cords. All the components of Volition are designed to guarantee optimal performance as a complete system.
- Volition™ Category 5e solution (standard bandwidth up to 100 MHz) supports 10 MHz, 100MHz and 1G Ethernet for those businesses with a limited need for bandwidth and a short to medium-term investment strategy in infrastructure.

| Version | U/UTP Cat.5e       | F/UTP Cat.5e       |
|---------|--------------------|--------------------|
| EMC     | Low                | Medium             |
| Cables  | U/UTP Cat.5e       | F/UTP Cat.5e       |
| Cords   | U/UTP              | F/UTP              |
| RJ45    | UTP                | FTP                |
| Class D | 100 Mb/s<br>1 Gb/s | 100 Mb/s<br>1 Gb/s |

### Volition RJ45 Faceplates and modules

- Available in many different formats compatible with UTP and FTP Category 5e RJ45 jacks
- Have automatic dust shutter when fitted with a jack
- Low depth when fitted with a jack

## 1.3 Volition™ Category 5e Cabling System

### Volition RJ45 K5e keystone jack

- Tool-less termination
- Re-usable jack
- Connector can be terminated with both solid and stranded wires
- Integral shutter
- Separate wire guide indicating the contact number and the wiring codes TIA 568A and TIA 568B
- IP50
- UTP – coloured jacks available
- Bulk packaging available

## 1.3 Volition™ Category 5e Cabling System

### Volition RJ45 19" Patch Panels for K5E Jacks

- Modular patch panel for RJ45 keystone jacks
- Delivered without connectors
- Can be equipped with Volition RJ45 K5E Jacks
- Direct and individual earthing protection upon insertion of jacks (FTP and STP)
- Delivered with screws and cage nuts
- Compatible with the RJ45 splitter locking system (Type CBV in 16 and 24 ports versions in black)

## 1.3 Volition™ Category 5e Cabling System

### Volition RJ45 patch cords

- Compliant to Category 5e hardware performance
- These cords allow the implementation of Class D ISO/IEC Channel and Category 5e TIA Channels at 100 MHz
- Round cable
- Moulded boot
- Straight wiring
- PVC or LSOH jacket
- Standard colour: Grey

## 1.3 Volition™ Category 5e Cabling System

### Category 5e Cable

#### Volition Category 5E cables

- Volition™ Cables allow easy termination to RJ45 jacks. The Volition™ Category 5e cables are available in U/UTP and F/UTP versions, with PVC or LSZH (Low Smoke Zero Halogen) jacket.

#### Copper cable, 4 pairs, Category 5E, U/UTP, LS0H

##### Cabling standards

- EN 50173
- ISO/IEC 11801
- TIA/EIA 568
- EN 50288-2-1
- IEC 61156-5

##### Environmental characteristics (LSZH)

- Flammability performance IEC 60332-1
- Smoke emissions IEC 61034
- Toxicity/acid gas IEC 60754-1/-2

| Type        | Colour | Max. Diameter | Weight | Fire loading | Max. Pulling Tension (N) |
|-------------|--------|---------------|--------|--------------|--------------------------|
|             |        | mm            | kg/km  | MJ/Km        |                          |
| 4P (LSZH)   | Green  | 5,75          | 36     | 371          | 80                       |
| 2x4P (LSZH) | Green  | 6,0x12,5      | 72     | 782          | 160                      |
| 4P (PVC)    | Green  | 5,75          | 35     | 417          | 80                       |
| 2x4P (PVC)  | Green  | 6,0 x 12,5    | 67     | 825          | 160                      |

- 1 – Conductor material: copper wire  $\varnothing$  0,50 mm (23AWG)  
 2 – Insulation material: Polyethylene  $\varnothing$  0,95 mm  
 3 – Pairs: 4 and 8 (2X4)  
 4 – Synthetic tape  
 5 – Alu/polyester tape and copper drain wire  
 6 – Jacket material: LSZH or PVC  
 Colour: green

##### Electrical characteristics at 20°C

- Complete conductor resistance (max):  $\leq 190 \text{ Ohm / km}$
- Insulation resistance (500V):  $\geq 5000 \text{ MOhm / km}$
- Dielectric strength at 50 Hz 1 kVdc / 1 min (no breakdown)
- Capacitance unbalance – pair to ground:  $\leq 1600 \text{ pF / km}$
- Propagation velocity (NVP): 78%
- Characteristic Impedance at 100 MHz:  $100 \pm 5 \text{ W}$
- Transfer impedance
  - at 1 MHz  $> 40 \text{ mW / m}$
  - at 10 MHz  $> 40 \text{ mW / m}$
  - at 30 MHz  $> 50 \text{ mW / m}$
  - at 100 MHz  $> 200 \text{ mW / m}$

##### Mechanical installation characteristics

- Minimum bending radius (installation) 50 mm
- Minimum bending radius (installed) 25 mm
- Temperature range (°C)
  - Transport / storage / installation: 0 to +50°C
  - Service: -20 to +60°C

### Electrical performance

## 1.4 Industrial RJ45 Connector

### Description - Industrial RJ45 Connector

A complete, easy to use IP67 solution for an industrial network based on copper RJ45 connections. The system consists of shells which go over the RJ45 connection giving demountable IP67 protection that is waterproof and dustproof when connected. The system is suitable for use with 3M category 5e, 6 or 6A jacks and with 3M's patchcords, whether watertight or standard. A cap is available for the socket shell to protect the receptacle when it is not in use. The shell for the patchcord plug does not need to be fitted using a tool, so it is easy to move when required.

### Features

- IP67 Solution
- Assembly of the shell on a patchcord does not require any tools
- Patchcord shell may be used on most cords in the market
- Installation of the connector and base plate does not require any tools
- Connector is removable from the base plate and reusable
- Cable entry to top or bottom of the 3M jack
- Integrated shutter protection on the jack when the patchcord is demounted
- May be used with solid or stranded wires AWG 26 to 22

### Benefits

- Suitable for difficult or industrial environments
- Easily Implemented. Time saving
- Possibility to retrofit IP67 protection to existing systems
- Quality and speed of connection is not dependent on the state of the tools nor on the competence of the installer
- No wasted connectors. No time wasted waiting for a new delivery of product
- Easier to observe the minimum bend radius. Easier to use in boxes with shallow depth
- Sealing increased with dust, particularly during the installation or in dirty environment
- Compatible with many cables on the market

### Technical Details

- Locking reversed bayonet
- Sealing IP67: conforms to IEC 60.512-5 test 9a
- Fire/Smoke: UL94 V0

## 1.4 Industrial RJ45 Connector

### Ordering Information

#### IP67 Plastic shell for patchcords

- Easily fitted to most patchcords
- May be assembled without tools
- Reverse bayonet closing mechanism

| VOL78006 |

### Stainless Steel Faceplate for IP67 Receptacle

---

- Includes sealing gaskets and 2 M4 fixing screws
- Dimensions: 86 x 86 mm

> Stainless Steel Faceplate for IP67

| Ref. No. |
|----------|
| I67FP1S  |

## 1.5 Splitters

### Description - Splitters

New splitters are compatible with older faceplates and panels. Lockable on new keystone panels of 16 and 24 ports. Lockable on all new 3M French style wall outlets. Overall dimension: 50 x 34 x 21 mm

### New Splitter

> How to install the splitter in French Style Faceplates

Diagrams of the New Installation Process

| Mounting | Locking  | Unlocking and Removal |
|----------|----------|-----------------------|
| <p>1</p> | <p>1</p> | <p>1</p>              |
| <p>2</p> | <p>2</p> | <p>2</p>              |
| <p>3</p> |          | <p>3</p>              |

#### The new 3M splitter range offers:

- optimal reliability of connection
- locking function to selected patch panels and French style faceplates
- improved mechanical characteristics
- small overall dimensions
- retrofittable to older faceplates and panels, without the locking function

#### The new design allows:

- improved mechanical hold due to the creation of two zones of support on the splitter
- mechanical locking by expandable fitting
- Easy removal thanks to a pull knob patented by 3M laboratories

### Features

- Two zones of support on the splitter
- Mechanical lock with expandable fitting
- Removal by pulling a knob
- Removal knob located in bottom of the splitter
- Improved ergonomics
- Complete range for 4 applications

### Benefits

- Stability of the splitter on the faceplate or panel
- Secure fixing of the splitter
- Simple removal using only one hand
- Removal knob easily accessible on panel
- Less space taken up in the workspace
- Applications: Ethernet/Ethernet, Ethernet/Telephony, Ethernet/Numeris ISDN, Telephony/Telephony

## 1.5 Splitters

### UTP and FTP RJ45 Splitters

- Consists of a RJ45 plug and 2 RJ45 sockets RJ45 for sharing pairs
- Adaptable to all RJ45 panels 16, 24, 32 and 48 ports and RJ45 Keystone faceplates
- Polycarbonate/ABS white colour

## 1.6 Boxes for Surface Mounting

### Description - Boxes for Surface Mounting

#### A good choice of models

- For mosaic standard faceplates with the format 22,5 X 45 mm or 45 X 45 mm used for:
  - telephone points (PBI), data points (RJ45)
  - Clip on front plates

#### Easy to install

- Pre-pierced for cable entry or are provided with push in openings
  - Surface mounted boxes in ABS, single or multiple sockets

#### Safe to install

- All the models are equipped with either an insulating partition or distinct compartments

### 45 x 45 mm Module Supports

#### Single box in ABS

- PBM1 box for surface mounting 45 x 45 m faceplates
- White (RAL 9011)
- 65 x 65 x 48 mm

#### > Single box in ABS

Ref. No.

P28420AA

#### Wall Mounted Boxes

#### > PBM2 box for surface mounting 45 x 45 m faceplates

- For two 45 x45 mm faceplates
- Fits PBM2 Cover (P28691AA)
- White (RAL 9011)
- 150 x 80 x 42 mm

#### > PBM2 box

Ref. No.

P28690AA

#### > PBM2 Cover

- For mounting on box PBM2
- Requires two faceplate supports (P28692AA)
- White (RAL 9011)
- 150 x 80 x 9,5 mm

#### > PBM2 Cover

Ref. No.

P28691AA

## 1.6 Boxes for Surface Mounting

### > PBM3 Box for surface mounting 45 x 45 mm faceplates

- For three 45 x 45 mm faceplates
- Fits PBM3 Cover (P28691AA)
- White (RAL 9011)
- 205 x 80 x 42 mm

| Ref. No. |
|----------|
| P28695AA |

### > PBM3 box

### > PBM3 Cover

- For mounting on box PBM3
- Requires three faceplate supports (P28692AA)
- White (RAL 9011)
- 205 x 80 x 9,5 mm

| Ref. No. |
|----------|
| P28696AA |

### > PBM3 Cover

### > Faceplate Support

- Fits between the box and the cover
- Polycarbonate with 30% fibre glass
- 75 X 64 X 10 mm

# Fibre Cabling Solutions

3M™ offers a complete line of single-mode & multimode fibre optic connectors including Volition VF-45™, ST, SC, FC and LC styles. These are available with a range of on-site termination processes including No Polish NPC, Hot Melt, Crimplok and VF-45. Also offered is preterminated MPO system for rapid deployment in backbones or data centre cabling. To complement this, connectors are also available terminated as pigtails for direct splicing or patch cords in a variety of lengths to complete the fibre links.

There is also an extensive range of assembly kits, mounting hardware & accessories including 19" patch panels and distribution boxes. The Fibriok™ mechanical splice, available in single- and multifibre versions for single- and multimode fibre completes the offering of Fibre Interconnect Solutions.

## 2. Fibre Cabling Solutions

## 2.1 Volition™ VF-45™

### Description - VF-45™ Socket

The Volition socket is part of 3M's duplex, small form factor fibre optic interconnect system. Applications include affordable, high bandwidth systems, fibre-to-the-desk networks, fibre backbone systems, data centres, fibre LANs and storage area networks.

The VF-45 plug and socket work like an 8-pin modular jack, bringing the simplicity of the RJ45 jack to optical fibre applications.

### Specification

- Simple installation using an unique termination process
- No expensive ceramic parts
- Footprint dimensions of a RJ45 copper connector
- High density of duplex connections
- Integral dust protection

### Ordering Information

> **VF-45 Socket, Multimode**

- including fibre holder
- PU: 96 Units, MOQ: 1 PU

Ref. No.

**VOL-0001**

> **VF-45 Socket, Single-mode**

- including fibre holder
- PU: 96 Units, MOQ: 1 PU

Ref. No.

**VOL-0002**

> **Fibreholder for VF-45 Socket, Multimode and Single-mode**

- Spare Part for VOL-0001 and VOL-0002
- PU: 96 Units, MOQ: 1 PU

Ref. No.

**VOL-0011**

## 2.1 Volition™ VF-45™

### Description - VF-45 Tools and Consumables

Volition™ VF-45™ Quick Install Termination Kit with™ VF-45™ Socket

The VOL-0562 socket termination kit contains all the materials necessary to install VF-45 sockets onto duplex fibre optic cable. Cable and fibre strippers, polishing and socket assembly fixture and inspection viewer - all fit into a compact carrying case. The termination kit works in concert with the 'snap together' design of the socket to eliminate many of the steps and much of the labour associated with traditional fibre optic terminations. With the VF-45 socket termination kit, you can complete fibre installations faster and easier; duplex fibre terminations can be completed in less than two minutes.

Polishing Station

Microscope 100x

### Ordering Information

> VF-45 Quick Install VOL-0563 Termination Kit, complete with 100x dual light microscope

- PU: 1 pc, MOQ: 1 pc

### 2.1 Volition™ VF-45™

Volition™ VF-45™ Maintenance Cleaning Kit

#### Description - Volition™ Cleaning Kits

The VOL-0570 maintenance cleaning kit keeps VF-45 fibre interconnects in wall boxes, patch panels or electronic equipment operating at a 'just installed' optical performance level. The system comprises a spray bottle of Volition HFE-based cleaning fluid and separate attachments designed for VF-45 socket and plug insertions. HFE based cleaning fluid is non-flammable and non-conductive. The maintenance cleaning kit is convenient, effective and a quick way to clean fibres and faces, without disassembly from face plates or panels.

To complement the VOL-0570, the VOL-0570B allows the cleaning of both fibres in VF-45 test leads. This kit provides a convenient, effective and quick way to clean both fibres in plugs on patch cords and reference test leads.

Volition™ VF-45™ Mechanical Plug Cleaner

## 2.1 Volition™ VF-45™

### Outlets and faceplates for wall and trunking mounting

- **Wall Mount**

Volition wall mount outlets can house up to two VF-45 sockets; one VF-45 and one RJ45 or two RJ45 sockets, providing they employ keystone latching and that they are a compatible size.

- **Flush Mount**

The VOL-0257 flush mount outlet comprises a 45 x 90mm clip-in module that is used in conjunction with a separately supplied mounting and faceplates. Typically used in trunking or pillar applications, it can house up to two VF-45 sockets.

- **Furniture**

Volition modular furniture outlets will house a maximum of two VF-45 sockets. To save space, the VF-45 plug lays parallel to the furniture partition. The outlets are available in white.

- **Multiway**

The 2552 VF multiway outlet was developed primarily for zone cabling. Up to six VF-45 sockets can be installed. Very easy assembly and clearly laid-out fibre management are combined in this robust plastic box.

### Specification

- Wall mount outlets available in white
- Guaranteed minimum bend radius of 25mm
- Integrated strain relief for horizontal cables
- Hybrid applications possible
- Compact design of wall mount outlet results in only a 28 mm protrusion from the wall

### Ordering Information

- > **Wall Outlet for 2 x VF-45 Socket**

### 2.1 Volition™ VF-45™

#### Description

#### Volition™ 19" Patch Panels

The Volition patch panel range offers a suitable patch panel for every installation requirement. The 'flush mount' technology of the VF-45™ sockets provides a smart and maximum port density solution resulting in efficient use of the space available in the 19" rack.

#### Specifications

- Versions: 1U 24 ports and 2U 48 ports
- Colour: - cream, similar to RAL 1013
- Internal features to ensure secure fixing of incoming cables and correct storage of excess fibre
- Sliding drawer feature for easy access
- Simple installation of the VF-45 sockets
- Easy cable management

#### Ordering Information

## 2.1 Volition™ VF-45™

### Description - Patch Cable, Multimode 50/125/250µm

Factory made VF-45 duplex patch cables in various lengths are used for patching between sockets or for making the connection to transceivers on the workstation, hub or switch. The patch cables are a universal type, which is both riser and LSZH rated. Hybrid cables to connect ST, SC, LC and MTRJ interfaces are also available.

Other Hybrids available upon request.

### Specifications

- Duplex connection
- Factory made VF-45 duplex patch cables in various lengths
- Automatic dust protection protects fibres in unmated condition
- Tested to TIA/EIA and IEC performance requirements
- Patchcords made with 3M's innovative coated fibre, GGP, minimum bend radius 25 mm

## 2.1 Volition™ VF-45™

### Description - Test leads - Reference Cable Kits

Volition reference cable kits enable connections to be made to test equipment fitted with an ST or SC connector interface. The transmit cable consists of a VF-45 socket on one end and a choice of either 2 ST, SC or FC at the other end. The receive cable has a VF-45 socket housed in a protective casing on one end and at the other there are either 2 ST or 2 SC connectors.

### Specifications

- Guaranteed high quality
- Receiver or transmitter cable with VF-45™ connector
- Available with either two SC or two ST connectors for connection to test equipment.

## 2.1 Volition™ VF-45™

### Description - Media Converters 10Mb/s and 100Mb/s

Volition™ 10 Base T (Volition™ RJ45) 10 Base FL

Volition media converters allow simple and cost effective usage of existing network equipment (fitted with RJ45 connectors for copper wiring) with fibre optic cables. The Volition media converter converts a twisted pair signal into the corresponding optical signal.

The media converters are available as either a compact stand alone item for installation in the work place or as a 19" version with 12 and 24 x VF-45 (10 Mb/s) for rack mounting in distribution areas.

### Specifications

- IEEE 802.3/802.3u and 802.3z compliant
- 32 bit bus mastering (10 and 100Mb/s cards)
- Most common operating systems supported

## 2.2 Volition™ Installation Indoor Cable

### Description - Cable 50/125µm, 62,5/125µm, 9/125µm

#### Indoor, horizontal and backbone cable

All Volition™ multimode indoor cables are in accordance with the latest specifications as described in ISO/IEC 11801. Cables with 50/125 OM3 fibres are optimised for applications in the first window (850 nm) and are ideal for Fibre Channel and Ethernet at up to 10Gbit/s at distances up to 300 m. 50/125 OM2 cable is better suited to gigabit Ethernet (1000 BASE-SX and 1000BASE-LX) and slower speeds at distances up to 550 m. All single mode cables are OS1 category and 62.5/125 cables are OM1 category.

Indoor cables are suitable for a temperature range of -10°C to +60°C. All cable jackets are LSZH (low smoke zero halogen) rated to fulfill the safety requirements for internal cabling.

As standard, multimode cables are blue and single mode cables are green.

2 & 4 fibre Horizontal cable construction

### Specifications

24-fibre Backbone cable construction

## 2.2 Volition™ Installation Indoor Cable

### Description - Cable 50/125µm

#### Indoor, horizontal and backbone cable multimode

Volition™ Indoor cables are in compliance with all existing industry standards. Each pair of 250 µm coated fibres is contained within a separate buffer tube, which allows for simpler and quicker terminations into the VF-45™ socket. This and the easy to use colour coding enable easy installation as well as convenient cable management.

#### Notes

1. Cable colour is blue for 50/125 µm and 62,5/125 µm cable and green for 9/125 µm cable
2. The short term bend radius is under installation conditions
3. MC = OM3 cable

### Specifications

- Small cable diameter
- Produced to industry standards
- Two fibres per soft buffer tube
- Colour coded fibres
- Low friction jacket on backbone cables
- Available in both multimode and singlemode

### 2.3 Volition™ Installation Indoor/Outdoor Cable

#### Description

#### Indoor / Outdoor Cable, 50/125/250µm, 62,5/125/250µm, Singlemode 9/125/250µm

The Volition Indoor / Outdoor fibre optic cable includes both horizontal and backbone cable with either 50/125µm OM2, OM3, or OM4, 62,5/125µm OM1 multimode or 9/125µm singlemode fibre.

The primary application of the cable is for indoor and outdoor installations into cable trays or ducts in LANs. All cable sheaths are LSZH (low smoke zero halogen) rated to fulfil the safety requirements for internal cabling. All cable variants have good resistance to water which is achieved by a combination of an expanding tape and gel filled tubes allowing for the cables to be installed in areas where water within ducts is a possibility.

Each category of Volition Indoor / Outdoor cable is available in fibre counts ranging from 2 to 48 fibres.

Other constructions are available upon request.

#### Specifications

- Cable construction with glass yarn fully dielectric for immunity against lightning
- All tubes containing fibres are gel filled for protection against water
- The cable core is protected against water ingress by an expanding tape.
- UV stabilised sheath makes the cable suitable for external use
- Fibres are colour coded for fast installation and organisation
- Operational temperature for 2 to 24 fibre cables: -20°C to 60°C; max attenuation variation is 0.5 dB/km
- Operational temperature for 48 corrugated steel fibre cables: -40°C to 60°C; max attenuation variation is 0.1 dB/km (up to the max specified value)

#### Technical Specifications

## 2.4 Volition™ Break-out Fibre Cable

### Description - Cable 50/125 µm, 62.5/125 µm, 9/125 µm

#### Easy to Install and Handle

3M Volition Network Solutions from 3M includes 900µm buffered fibre cable with 50/125 µm multimode OM2, OM3 and OM4, 62,5/125 µm multimode OM1 and 9/125 µm singlemode OS1 fibre as part of the system.

The primary application of the cable is for indoor use in cable trays or ducts as LAN cabling. All cable jackets are LSZH (Low Smoke Zero Halogen) rated to fulfil the safety requirements for internal cabling.

Each category of Volition Break-out Cable is available in fibre counts of 4, 6, 8, 12, 24 fibres.

#### Specifications

- 900 µm coated fibres for fast and simple direct termination or splicing.
- Fibres are colour coded for fast installation and organisation
- Operational temperature for 2 to 24 fibre cables: -20°C to 70°C; max attenuation variation is 0.5 dB/km
- Glass yarn for light rodent protection
- Small cable diameter for easy installation

#### Technical Specifications

### 2.5 3M No Polish Connectors

#### Description - SC No Polish Connector

**Cross-sectional view of actuated splice:** After the fibre is inserted, the assembly tool depresses the cap to force clamping and locating surfaces against the fibre, locking and aligning the fibre place.

**3M No Polish Connector (NPC) enables fast, on-site installation of 250µm and 900µm connections utilizing a one piece, pre-assembled design.**

**The SC compatible connector consists of a factory-polished ceramic ferrule, fibre stub and a mechanical splice that is installed with a simple field tool. A bell-shaped boot is attached to the connector body, minimizing the chance of losing or forgetting to install the boot during the connection.**

**The No Polish Connector is tested for Premises and FOTP applications for indoor and outdoor locations and is available in SM, 62.5µm, 50µm and also 50µm LOMMF (laser optimised multimode fibre OM3) for high data rate applications.**

3M No Polish Connector Assembly Tool

#### Features

- Field installation
- One piece, pre-assembled design
- Simple assembly tool
- 900µm buffer strain relief
- Fibre holder for assembly
- Factory-polished fibre stub in ferrule
- Bell-shaped boot

#### Benefits

- Always right cable length with no cable slack to store
- No small, loose parts
- Fast, easy installation
- Excellent pull out strength
- Designed to eliminate the need to touch bare fibre
- No on-site polish or adhesives required
- Helps prevent fibre from bending below minimum bend radius

### 2.5 3M No Polish Connectors

#### Description - LC No Polish Connector

3M No Polish LC Connectors, 250µm/900µm

As the LC connector type becomes more and more the connector of choice in both FTTH and local area networks, 3M has developed a complete range of LC NPC connectors.

As for the SC range we offer single-mode versions with UPC and APC endface geometry. Multimode LC NPC connectors are available for all common fibre types, like 50/125µm OM2 and OM3, as well as for 62,5/12µm fibre.

#### Features

- Field installation
- One piece, pre-assembled design
- Simple assembly tool
- 900µm buffer strain relief
- Fibre holder for assembly
- Factory-polished fibre stub in ferrule

#### Benefits

- Always right cable length with no cable slack to store
- No small, loose parts
- Fast, easy installation
- Excellent pull out strength
- Designed to eliminate the need to touch bare fibre
- No on-site polish or adhesives required

## 2.6 3M LC Connectors, Couplings and Pigtails

### Description - 3M™ LC Connectors / Couplings / Pigtails

3M™ LC Connectors Hot Melt

3M™ LC Couplings

The LC small form factor connector has become the most popular interface for optical line equipment over the last few years and is well established in fibre backbones and data centres.

3M has expanded their easy to use product line of Hot Melt fibre optic connectors and now offers also LC Hot Melt connectivity for single and multimode applications.

The 3M Hot Melt system combines the ease of installation together with the advantage of spliceless direct termination in patch panels and outlets.

Due to its small size, the LC-Connector allows doubling of the port density in 19" cabinets. By design the LC is the perfect choice for high data rate applications.

## 2.10 3M™ Hot Melt System

### Description

#### 3M Hot Melt optical fibre connector assembly system

The 3M Hot Melt system offers most convenient field connectivity for fibre optic connectors. From direct termination of breakout cables in patch panels over pigtails up to patchcords, Hot Melt connectors fit every application. The connectors are pre-filled with hot melt adhesive which just needs to be heated for easy termination.

All connectors have ceramic ferrules and different coloured boots enable clear port identification. A universal termination kit plus different upgrade kits enable to install all type of 3M Hot Melt connectors.

- Quick, simple and safe assembly in the field or factory
- Connector, adhesive and polishing film from one manufacturer guarantees a high quality connector
- Simple polishing process, either manually or with a polishing machine
- All connectors contain a zirconia ferrule and Hotmelt adhesive
- Boots are available in various colours for definite channel separation
- Suitable for all LAN and CATV applications
- Suitable for internal or external applications

#### Kit contents:

- Hotmelt oven with 230V power cords for Europe and UK
- Universal connector holder for ST, SC, FC connectors
- Polishing pad, classic, round («one step»)
- Polishing film 2µm, round, light green, 50 ea
- Polishing film 9µm, gray, 10 ea
- Polishing film 0,5µm, final polish, frosted, 20 ea
- Polishing jig
- Jacket/Buffer/coating stripper
- Kevlar scissors
- Universal crimp tool
- Carbide scribe blade
- Viewscope (200x)
- Express glue
- Lint free wipes with dispenser
- Bottles for water and isopropyl alcohol
- Safety container for fibre stubs
- Roll up pouch
- Fibre marking pen
- Training CD and instruction manual

### Ordering Information

#### > Universal Hot Melt Termination Kit

The Hot Melt Termination Kit for ST, SC, FC and LC-Connectors contains all tools and consumables, which are necessary to terminate 3M Hot Melt Connectors in the field.

### 2.10 3M™ Hot Melt System

#### Description

##### 3M Hot Melt Autopolisher / 3M Tubing Kit

The 6851-E duplex Auto Polisher is a robust polishing machine designed for field polishing of 3M Hot Melt connectors with the performance of a factory polish.

The receptacle of the machine has a clamp mechanism, that allows to polish two Hot Melt (ST, SC or FC) connectors of the same type at a time.

This polishing machine is designed for high volume installations of Hot Melt connectors and ensures a constant polishing quality.

3M Hot Melt Autopolisher

#### Technical Specifications

- Voltage (primary): 230V/50Hz, wallsocket PS
- Voltage (secondary): 15V DC / 1A, plus on centre
- Dimensions: 170 x 185 x 120 cm
- Weight: 1,7 kg
- Timer intervals: 30, 60, 90, 120 sec.

#### Ordering Information

|  | Ref. No.              |

| <p>&gt; <b>Polishing film, 2µm</b><br/>with hole for 6851-E Autopolisher</p> <ul style="list-style-type: none"> <li>• PU: 50 pcs</li> </ul>  | <b>6192-B</b>         |
| <p>&gt; <b>Tubing Kit</b><br/>This Tubing or Breakout Kit is for direct termination of Hot Melt connectors on loose tube cables with 250µm primary coated fibres. The 900µm buffer tube slides over the primary coated fibre and offers more mechanical protection as well as better strain relief on the connector.</p> | <b>DE-0100-0900-4</b> |

##### Kit Contents:

- Transparent PP-tube (60 m)
- Heatshrink tube 6,4, x 50 mm with glue (25 ea)
- Metal protection tube for the separation zone loose tube/buffer tubes (25 ea)
- Colour rings for coding (12 different colours, 10 ea colour)
- Instruction manual

## 2.11 3M™ Crimplok Connector System

ST Connector

SC Connector

### Description

#### Crimplok

The Crimplok connector combines the speed of non-adhesive connectors with the performance characteristics of epoxy and Hot Melt connectors. Crimplok Connectors are the ideal solution for emergency restoration work or for quickly making fibre connections at the desk.

Crimplok connectors were designed to:

- Save time in installation
- Provide rugged, reliable performance, meeting or exceeding current EIA/TIA 568, ISO 11801 and EN 50173 specifications.
- Install cleanly and simply with fewer parts and tools.

Available in both SC and ST, single mode and multimode connector versions, Crimplok connectors are faster to install than epoxy connectors since there is no set-up or curing time. Crimplok connectors do not require special heating tools or ovens, so time spent searching for electrical outlets is eliminated. Polishing the connector is also a simple process that can be performed in seconds.

The Crimplok connector incorporates proven 3M malleable metal element fibre gripping technology. There is no fibre splice or second joint inside the connector, so there is no added attenuation at the connection. When the conformable metal element closes, it grips a length of the fibre, eliminating fibre movement associated with other crimp-style connectors. The strength of the metallic element ensures that Crimplok connectors meet industry standards for temperature and humidity.

### Ordering Information

#### > Crimplok assembly case

The Crimplok assembly kit for ST and SC connectors, contains all the tools and consumables needed for assembly. Supplied in a convenient carrying case.

### 2.12 3M MPO Preterminated System

#### Description

With the introduction of this product line 3M offers state of the art connectivity for data centre cabling.

The patented modular construction combines the highest port density with typical 3M ease of installation.

The 19" sub-rack patch panel accommodates up to 4 preconnected modules with a port density of 24 LC connections per module. A total of 96 LC connectors can be connected on one height unit. The rear side of the module has two entry ports for 12 fibre MPO ribbon backplane cables.

The strain relief of the MPO backplane cable can be fixed with cable ties directly on the backplane of the modules. This allows full front access termination without the need to remove the 19" subrack and does not require a two part sliding construction of the sub-rack.

These installer friendly modules are available as pre-terminated 12- port MPO/LC duplex or as 12 port LC/ LC duplex straight through versions.

The connection between two panels is made by either MPO/MPO or MPO/LC pre-terminated backplane 12 fibre ribbon cables with 50/125µm either OM3 or OM4 or singlemode fibres inside. The same fibre is used in the modules.

#### Features

- LC duplex connectivity
- Modular design
- Patented strain relief on the module backplane
- Pre-assembled modules
- Pre-connectorized MPO backplane cables
- EIA/TIA Version B cabling with pair flipped module

#### Benefits

- High port density of 48 (96 LC connectors) ports on 1U
- Flexibility for re-arrangements
- Full front access, no removal of patch panel required
- Ease of installation, no risk of fibre breakage
- Plug and play
- Straight through MPO/MPO backplane cables

#### Specification

- Insertion loss MPO, typical (dB): 0,35
- Insertion loss MPO, max. (dB): 0,75
- Insertion loss LC, typical (dB): 0,20
- Insertion loss LC, max. (dB): 0,40

### 2.13 3M™ Fibrlok System

3M Fibrlok II Universal Optical Splice 2529

#### Description

The right splice for today's applications.

The 3M Fibrlok II Optical Fibre Splice 2529 has a proven record of consistent performance that makes it the right choice for FTTH, metro and enterprise network applications ranging from one Gigabit to 10 Gigabit data rates and above. The simplicity of the splice tool is the reason that the Fibrlok is so relevant to today's need for low cost rugged splicing equipment at multiple locations. The simple process minimizes the need for training and highly skilled technicians. The ability to reposition the fibres within the splice provides a high yield. All these features add up to faster installations and increased productivity in both restoration and construction applications.

Since the Fibrlok was released in 1988, more than 10 million Fibrlok splices have been installed around the world in many different types of applications, both indoor and outdoor. The Fibrlok II Splice 2529 uses a metallic splicing element held inside a moulded plastic body and cap that is designed for splicing any combination of 250 to 900µm coated fibres. The Fibrlok splice can be used with either single-mode or multimode fibres with a nominal glass cladding of 125µm and the splice insertion loss averages less than 0.1 dB. Fibre retention is greater than 4.4 N. The splice provides stable performance from -40° to 80° C.

The 3M Fibrlok splice can be used in aerial, buried, underground, pedestal applications, inside or outside buildings, or as a high-density substitute for Fibre optic connectors in FTTH (Fibre-to-the-Home).

#### Features

- Universal splice for single- and multimode fibres
- Installation time less than 30 seconds
- For all 250µm and 900µm coated fibres
- Identical strip lengths for all coatings
- Repositioning of the two fibres possible
- Extended life cycle (> 30 years)
- Complies with international standards

#### Benefits

- For all fibre connections (125µm)
- Quick and cost effective
- Universal applications
- Installer friendly
- Optimized insertion loss
- Reliable
- Saves investment

## 2.13 3M™ Fibrlok System

**Cross-sectional view of open and actuated 3M Fibrlok II Splice 2529**

After preparation, the fibres are inserted into the Fibrlok II splice element. The actuation lever is then used to close the cap, forcing the clamping and locating surfaces against the fibres and aligning the fibres precisely and permanently in place.

## 2.13 3M™ Fibrlok System

### Description

3M Fibrlok II splice/holder integrates the 3M Fibrlok II splice 2529, actuation tool, and holder all in one package. It enables

fast, on-site installation without a separate assembly tool or splice tray.

Designed for restoration of broken fibre and the final Fibre-to-the-Premise (FTTP) drop connection, it can be easily used with singlemode or multimode fibres with 250µm or 900µm tight buffer coating.

Clamps on each side of the splice provide strain relief for the 900µm tight buffer for long-term stability and reliability. Very high bond tape on the bottom of the splice/holder permanently holds it at the splice location, which is especially useful at optical network terminals.

The Fibrlok II splice/holder is also available with a pre-terminated SC/APC or SC/UPC pigtail (0.75 m) for easy installation. Pigtail is fabricated with 10 mm bend radius, bend insensitive, zero water peak fibre.

### Applications

- Inside or outside buildings
- Terminals
- Network interface devices (NIDs)
- Fibre distribution units
- Wall outlets

### Features

- Integrated splice, holder & actuator
- Push button actuation
- Buffer clamps
- Foam retention pad
- Adhere with VHB tape
- Pre-terminated SC pigtail

### Benefits

- No need for separate tray or actuation tool
- Easy splice operation
- Provide 900µm fibre strain relief
- Used for 250µm fibre splicing
- Flexible placement within terminal box
- Only one fibre needs to be prepared

### 2.13 3M™ Fibrlok System

#### Description - Fibrlok 2540G Fibre Splice

3M Fibrlok 250µm Fibre Splice enables fast, easy splicing of 250µm single-mode or multi-mode fibre in Enterprise or Fibre-to-the-Premises (FTTP) installations. This low-loss reliable splice can be installed by non-specialized technicians.

#### A Fraction of the Tooling Cost

The simple rugged splicing tool is inexpensive, portable, requires no power and can be used in any environment. Several crews can be equipped for less than the cost of a fusion splicer.

#### Fast Installation Time

Installation rate is generally twice as fast as a fusion splicer where only one or two splices are required. No wait time for warm up needed.

#### Applications

- Inside or outside buildings
- Fibre Closures and Terminals
- FTTP Drop Cables

#### Features

- Low loss and back reflection
- Simple splicing process
- Strong fibre retention
- Superior matching gel
- Rugged portable splice tool

#### Benefits

- Reliable high yield splices
- Increased installation rate
- Prevents fibre movement for stable performance
- Maintains quality of transmission over time
- Low expense to equip crews

### 2.14 3M™ Cable Assemblies - Multimode Patch Cords

ST-SC Patch Cord

#### Description - Patch Cords ST-SC

Factory made duplex patch cables in various lengths are used for patching between sockets or for making the connection to switches or transceivers on the workstation. The patch cables are LSZH rated. Hybrid cables and other lengths are available.

#### Technical Specifications

## 2.16 3M Preterminated Pigtail Modules

### Description

These pre-terminated modules are designed for 19" patchpanels which have a central thread to allow the mounting of DIN splice cassettes.

These modules are easier and cheaper to install than standard pigtails and trays.

12 each semi-tight buffered pigtails in different standard colours (IEC or Bellcore) are terminated in a DIN splice cassette. At the ends of the pigtails, the 900µm buffer is stripped off 1m. All pigtails are bundled and fixed with 2 cable ties at the entrance port of the cassette.

The stripped fibre ends are routed inside the cassette and are secured with tape as shipping protection.

Outside of the cassette the fibre bundle is held together by 4 short tubes, which can be slid over the bundle for flexible positioning.

The cassette is closed with a snap on lid.

6 twist tie clips with adhesive tape are included for more flexible fibre routing.

### Features

- Pre-stripped pigtails
- Terminated in DIN splice cassettes
- Colour coded pigtails
- Fibre bundles with sliding tubes
- For all commonly used connector types
- Snap on lid
- Twist tie clips with adhesive tape

### Benefits

- Saves installation time and cost
- Fits most of the 19" fibre patchpanels
- Easier connection to backbone cable
- Best fibre management and routing of pigtails in panel
- Universal solution for all fibre patchpanels
- Lid can be removed without moving cassette
- Flexible fibre routing

### Specifications

- **Material of cassette:** ABS
- **Dimensions of cassette:** 115 x 92 x 8 (W x D x H) without lid (IEC 61073, DIN 47662 Draft)
- **Colour of cassette:** RAL 9010
- **Pigtail length:** Stripped length inside 1m, buffed length outside 1m, staggered lengths
- **Pigtail colours IEC 304:** Red, green, blue, yellow, white, grey, brown, violet, aqua, black, orange, rose
- **Pigtail type:** 900µm semi-tight buffer
- **Fibre Routing support:** 6 each fibre routing clips with adhesive tape included
- **Dimensions:** Total length of each pigtail is 2,0 m

## 2.17 3M™ 19" Patchpanels

### Description

The SPP3-E patchpanel range is designed as a universal fibre optic patchpanel for direct termination with, for example, the 3M Hot Melt- or NPC connectors, or as a splice drawer to store pigtailed in DIN splice cassettes.

Multiple entry ports allow the use and fixing of 2 - 4 fibre horizontal cable as well as backbone cable with up to 48 fibres. The cable can be fixed either via cable glands or cable ties. The panels offer also fixing hooks for manifolds of pre-terminated backbone cable. A central thread allows stacking up to 4 DIN splice cassettes including the top lid.

The panels have a sliding mechanism with a defined hard stop, which prevents the drawer from being pulled out completely and therefore offers the installer a comfortable handling for both, new installation and re-arrangements.

The SPP3-E program offers two different versions.

- Empty panels
- Panels with pre-terminated couplings

### Features

- Sliding design
- Multiple cable entry ports
- Fixing for breakout manifolds
- Fixing thread for splice tray (DIN)
- Port numbering on front panel
- Universal cage nuts and bolts for 19" frames
- For all common connector standards

### Benefits

- Easy handling, installer friendly
- Handles all kind of backbone cable
- Handles also pre-terminated backbone cable
- Comfortable fibre management
- Easy traceability
- Comfortable installation
- One design fits all applications

### Specifications

#### Design features:

- Sliding 1U patchpanel with defined stop for the drawer
- Un-detachable knurled nut to fix the drawer to the housing
- Fixed front panel, not exchangeable

#### Included accessories:

- Universal cage nuts, screws and washers for 19" mounting
- Instruction manual

#### Housing material: Steel

- Dimensions: 44 x 483 x 250 mm (H x W x D), [19", 1U]
- Colour: RAL 7035 Light grey
- Surface: Powder coated, slightly structured
- Port numbering: Black, screen printed

## 2.17 3M™ 19" Patchpanels

### Description

The Eco-SPP3 range offers only panels with already fitted couplings.

Pre-assembled pigtail-splice cassette modules are available for easy field assembly of a complete 19" patchpanel.

The 3M Eco-SPP3 range is designed as fibre optic patchpanels mainly for backbone cable with pigtail splicing in splice cassettes, but can also be used for direct termination with, for example, the 3M Hot Melt- or NPC connectors. Four entry ports allow the fixing of backbone cable with up to 48 fibres through cable glands (16 or 20 mm). The panels offer also fixing hooks for manifolds of pre-terminated backbone cable. A central thread allows the stacking of up to 4 DIN splice cassettes including the top lid. The cassettes are secured against rotation.

Pre-terminated pigtail/cassette modules are available separately as accessories.

The panels have a sliding mechanism with a defined hard stop, which prevents the drawer from being pulled out completely and therefore offers the installer a comfortable handling for both, new installation and re-arrangements.

Eco-SPP3 panels are available in light grey (RAL 7035) and in black (RAL 9005).

### Features

- Sliding design
- Multiple cable entry ports
- Fixing for breakout manifolds
- Fixing thread for splice tray (DIN)
- Port numbering on front panel
- Universal cage nuts and bolts for 19" frames
- For all common connector standards

### Benefits

- Easy handling, installer friendly
- Handles all kind of backbone cable
- Handles also pre-terminated backbone cable
- Comfortable fibre management
- Easy traceability
- Comfortable installation
- One design fits all applications

### 2.18 3M™ Wall Outlets

#### Description - 3M 2552 SA Wall Mount Fibre Distribution Box

The 3M 2552 SA offers excellent fibre management in an affordable box with an attractive, low profile design able to be wall mounted anywhere in your LAN network. The box is also suitable for housing consolidation points.

The 2552 SA series brings efficient use of space as well as functionality and rugged durability. The boxes have a unique sliding lid to provide easy access to couplings and fibre management.

Interchangeable connector panels are available to accommodate: ST simplex & duplex couplings, SC duplex couplings, FC flanged couplings, FC "D" mount couplings, and the 3M Volition VF-45 Socket.

Fibres can either be directly terminated or spliced to pigtails using either Fibrok or fusion splicing. The 2552 SA is constructed from flame retardant material.

#### Ordering Information

## 2.18 3M™ Wall Outlets

### Description - 3M VOL-0255 FTTX Wall Outlet and Keystone adapter

The 8687 series are adapters that convert outlet ports with keystone latching to allow the fitting of SC simplex or LC duplex couplings.

This adapter can be used in patch panels as well as other outlets, like the 3M VOL-0255 or VOL-0256 Wall outlets.

An integrated spring loaded flap closes the port after unplugging the connector and protects against laser radiation as well as dust.

This adapter is the ideal product for wall and accommodates all SC simplex flanged couplings which are according to IEC 60874-14 or LC couplings with an SC footprint.

#### Features

- Keystone latching
- Spring loaded dust flap

#### Benefits

- Converts most keystone ports to SC simplex or LC duplex
- Protects against laser radiation and dust

#### Applications

Integration in VOL-0255  
80 x 80 cm

Integration in VOL-0256

### 2.18 3M™ Wall Outlets

#### Description - 3M 8686 Termination Box

##### 8686

- Wall mount hybrid box
- 86 x 86 mm format for 2 SC simplex or LC duplex couplings and one RJ45 copper jack.
- Flexible optical installation - both splicing to pigtails or field mountable connectors 3M NPC type or equivalent may be used.
- The box contains two holders for 3M Fibrlok mechanical splices or heat shrink fusion splice protectors.
- 6 slots for incoming cables and 1 additional opening in the centre for cable entry through an underwall box.
- Compatible with all 4 mm diameter round cable.

##### Contents

- Base
- Cover
- Holder for 2 Fibrlok splices or equivalent

#### Technical Specifications

##### Dimensions

- Height: 86 mm
- Width: 86 mm
- Depth: 35 mm

##### Minimum bending radius

- 30 mm for direct connector termination
- 20 mm on spliced pigtails

##### Fixing

- Wall mount with two screws or directly on 60 mm underwall box

##### Optical connection

- Round customer cable 4 mm diameter
- Anchoring point for cable

##### Connection Compatibility

- SC simplex or LC duplex coupling
- Field mountable simplex SC or LC termination with 3M NPC type or equivalent
- SC or LC pigtails with Fibrlok splices
- RJ45 keystone copper connection

## 2.19 3M™ Connection Boxes

### Description - PBPO/C Connection Box (Indoor)

#### Indoor Connection Box.

Connection interface between backbone and horizontal wiring or as a fibre consolidation point box.

Installation on standard cables and window cut cables.

#### Product composition

- 1 cable path with 2 strain reliefs for backbone cable
- A storage area for buffered fibres and microtubes (cut or uncut).
- A 4 slot organiser from the 3M BPEO Evolution range
- A range of splices trays for fusion splices, mechanical splices or splitters. Capacity of 12 to 48 splices.
- 1 connector panel for 12 SC type couplings.
- The PBPO is available for direct connection of drop cables.

### Technical Specifications

#### Dimensions

- Height: 204 mm
- Width: 158 mm
- Depth: 52 mm

#### Protection Performance ( EN 60529)

- IP 40 and IK08

#### Fixing

- Wall mounted 2 x M4 screws

#### Material

- Thermoplastic

#### Cable anchoring

- Main: on 2 holders (2 cable ties + 2 strain reliefs)

#### Cable diameters

- Main : 13.5 mm
- Drops : 4.5 mm

#### Cable types

- Window cut cables, termination cables, or uncut cables.

#### Connection

- 4 slot organiser to accept any Evolution splice tray
- Buffered fibre management
- Large storage area for fibres and microtubes
- Maximum capacity: 48 fusion splices

#### Couplings

- Blank ports for SC/APC or SC/PC couplings
- Compatible with duplex LC/PC and LC/APC couplings with LC footprint

### 2.19 3M™ Connection Boxes

#### Description - PBPO 12

##### Floor Distribution Box.

Interface between backbone and horizontal wiring or as a fibre splicing box.

Installation on standard cables and window cut cables.

##### Product Composition

- 1 cable path with 2 strain reliefs for riser cable.
- A storage area for buffered fibres and microtubes (cut or uncut).
- A 4 slot organiser from the BPEO Evolution range.
- A range of splice trays for fusion splices, mechanical splices or splitters. Capacity of 12 to 48 splices.

##### PBPO 12 Model

- PBPO 12 is equipped with 12 ports for 12 drops cables. Each port is equipped with a strain relief for each drop, with anchoring for the cable strength member and a rubber gasket for sealing. These two parts are fixed on the cable first and then put into the entry port.

#### Technical Specifications

##### Dimensions

- Height: 204 mm
- Width: 158 mm
- Depth: 52 mm

##### Protection Performance (EN 60529)

- IP 40 and IK08

##### Fixing

- Wall mounted 2 x M4 screws

##### Material

- Thermoplastic

##### Cable anchoring

- Main: on 2 holders (2 cable ties + 2 strain reliefs)
- Drops : 12 entry ports with external anchoring for 1 or 2 drops by cable ties

##### Cable diameters

- Main: 13.5 mm
- Drops: 4.5 mm

##### Cable types

- Window cut cables, termination cables, or uncut cables.

##### Connection

- 4 slot organiser to accept any Evolution splice tray
- Buffered fibre management
- Large storage area for fibres and microtubes.
- Maximum capacity: 48 fusion splices.

## 2.19 3M™ Connection Boxes

### Description - PBPO 24

#### Floor Distribution Box.

Interface between backbone and horizontal wiring or as splicing box.

Installation on standard cables and window cut cables.

#### Product Composition

- 1 cable path with 2 strain reliefs for riser cable
- A storage area for buffered fibres and microtubes (cut or uncut).
- A 4 slot organiser from the BPEO Evolution range
- A range of splice trays for fusion splices, mechanical splices or splitters. Capacity of 12 to 48 splices.

#### PBPO 24 Model

- PBPO 24 is equipped with ports for 12 to 24 drop cables. The drop cable strain relief is made outside the box before fitting into place. Anchoring is by cable ties.

### Technical Specifications

#### Dimensions

- Height: 204 mm
- Width: 158 mm
- Depth: 52 mm

#### Protection Performance (EN 60 529)

- IP 40 and IK08

#### Fixing

- Wall mount with 2 x M4 screws

#### Material

- Thermoplastic

#### Drops Anchorage

- Main: on 2 holders (2 cable ties + 2 strain reliefs)
- Drops: 12 entry ports with external anchoring for 1 or 2 drops by cable ties

#### Cable diameters

- Main: 13.5 mm
- Drops: 4.5 mm

#### Cable types

- Window cut cables, termination cables, or uncut cables.

#### Connection

- 4 slot organiser to accept any Evolution splice tray
- Buffered fibre management
- Large storage area for fibres and microtubes.
- Maximum capacity: 48 fusion splices.

### 2.19 3M™ Connection Boxes

#### Description - PBPO 6-12

The PBPO 6-12 is an indoor distribution box to splice up to 8 drops on a window cut riser cable. The splicing capacity is up to 12 fusion splices and 6 mechanical Fibriok splices. This box is designed with protective covers to hide the cables along the riser wireway.

#### Content of the kit:

- 1 box with a cover
- 1 splice tray for 6 mechanical splices
- 12 fusion splicing adapters
- 1 anti-twist cable and fan out module devices
- 2 cover extensions

#### Features

- Extension covers to hide riser cable and cable drops
- Double sided tray
- Width of 64 mm
- Kit of plastic parts

#### Benefits

- Good protection of fibres at the point of box entry and exit
- Separation of connected fibres and the waiting ones in the protection tray
- Installation in narrow riser
- Easy access and fast assembly

#### Technical Specifications

##### Box

- Overall dimensions with extension covers: 404 x 64 x 40 mm
- Colour: white RAL 9010
- Material: Free halogen thermoplastic
- Fixing: 2 screws, Ø 3.5 mm (not supplied)
- Protection: IP40 / IK 08
- Fire resistance: UL 94 V0

##### Cable entries

- Main cable: 1 window cut cable, Ø 6.6 - 13.5 mm
- Drops: 16 drops, Ø 4.2 - 9 mm

##### Splicing Management

- 1 tray, one side for splice, one side for storage (capacity of 24 fibres – 1.2 m)

##### Splices

- 6 Fibriok – 12 fusion splices

##### Packaging

- 1 kit = base and cover, plus accessories

##### Accessories

- 1 anti-twist cable module + 4 sets of 3 splicing fusion adapters + 1 tray + 2 extension covers

### 2.19 3M™ Connection Boxes

3M VKA 2/GF

#### Description

##### 3M VKA 2/GF

The VKA 2/GF optical fibre distribution box is specifically designed as an interior transfer or termination point for optical fibre runs. It is well-suited to environments where space is limited and a cost effective solution is required.

The VKA 2/GF houses two FO splicing cassettes which can hold up to 24 splice connections. With the addition of a connector mounting plate (optional) the boxes can also be used as a patch distribution frame. If hybrid cables are used, the modular design of the VKA 2/GF makes it possible for either two 10 pair or one 20 pair copper connector blocks (3M SID-CD) to be accommodated.

Protection rating: IP 40 (DIN 40050)

- Splice or patch distribution frame for 24 splice connections (2 FO splicing cassettes)
- FO connector mounting plates for 12 connectors E2000/SC, ST/FC or 6 connectors SC duplex or 12 LC duplex
- Accommodates hybrid cables using copper connector blocks, either 2x10 pair or 1x20 pair (SID-CD). Overvoltage protection can be used
- Lockable
- Remote monitoring via lid contact

#### Ordering Information

## 2.19 3M™ Connection Boxes

3M VKA 2/GF-EFM

### Description

#### 3M VKA 2/GF-EFM with single fibre management

The VKA 2/GF-EFM serves as a final distribution or splice distribution frame in optical fibre networks and is capable of accommodating up to 12 splice connections in six FO splicing cassettes.

A feature of the VKA 2/GF-EFM is that it provides the opportunity for both single and multiple fibre management. This type of fibre management enables the storage of the splice for a connection to be separate from all other fibres. Ideally, two fibres will be stored in one splicing cassette. Using this method to manage the fibres, existing fibre connections will not be affected, even at later extensions or service work. By using different connector mounting plates, the VKA 2/GF-EFM can be used as a patch distribution frame. It is possible to install a 10 pair copper connector block (3M SID-CT) for use with hybrid cables. Protection rating: IP 40 (DIN 40050)

- Single-fibre management for up to 12 splicing connections (24 fibres)
- FO cassette stack, completely removable
- Separate cable guide levels for incoming and outgoing sides
- Connector holders for SC, LC, ST or FC connections
- Copper connector block for hybrid cables
- Lockable
- Remote monitoring via lid contact
- Utilises the same design as the VKA distribution frame

### Ordering Information

#### > VKA 2/GF-EFM for 12 splice connections

- Dimensions (H x W x D): 330 x 200 x 100 mm
- Weight: approx. 2.1 kg

## 2.19 3M™ Connection Boxes

3M VKA/8GF

### Description

#### 3M VKA 4/GF, 3M VKA 8/GF

VKA 4/GF and VKA 8/GF are optical fibre distribution frames capable of housing up to 48 and 96 splice connections in either four or eight FO splicing cassettes, respectively. These capacities can be further expanded to 72 or 144 splice connections by the addition of a further 2 or 4 splicing cassettes. In these cases it will not be possible to install a FO connector mounting plate.

Using optional connector mounting plates, the two splice distribution frames can be converted to patch distribution frames.

The VKA 4/GF can be equipped with one, the VKA 8/GF with two connector mounting plates. For the use of hybrid cables (with copper leads), there is a provision for the installation of 10 pair copper connector blocks (SID-CT).

Protection rating: IP 40 (DIN 40050)

- Capacity as:
  - Patch distribution frame, 48 (VKA 4/GF) or 96 (VKA 8/GF) splice connections
  - Splice distribution frame, 72 (VKA 4/GF) or 144 (VKA 8/GF) splice connections
- Connector mounting plates for SC, LC, E2000, FC or SC duplex connections
- Copper termination for hybrid cables possible with overvoltage protection
- Remote monitoring via lid contact

## 2.19 3M™ Connection Boxes

### Description - 3M VKA 8 SCM for direct splicing

The VKA 8 SCM is an indoor splicing box. The organiser may be equipped with Evolution trays which well designed for fusion & mechanical splices as well as for splitter integration using up to 1x32 PLC splitters.

#### Content of the kit:

- 1 box with a cover
- 1 key lock
- 1 organiser 28 slots for 28 splice trays with max. 12 fusion splices
- Evolution trays have to be ordered separately and allow every kind of combination

### Features

- Standard box and organiser
- Minimum thickness and dimensions
- Box and cover in plastic & metal
- Removeable cover
- Large cable entry ports
- Efficient locking mechanism

### Benefits

- Wide number of trays available
- Will fit into small spaces
- Robust box
- Open access for splicing activities
- Perfect for multidrops distribution
- Tamper proof

### Technical Specifications

#### Box

- Overall Dimensions with extension covers: 550 x 330 x 125 mm
- Colour: Cover beige and brown
- Material: Galvanised steel and thermoplastic
- Fixing: 4 screws, Ø 6 mm (not supplied)
- Protection: IP40 / IK 08
- Fire resistance: UL 94 V0
- Security: delivered with 1 key lock

#### Splicing Management

- 1 Organiser with 28 slots for Evolution trays

#### Splices

- Whole range of Evolution trays (More information in chapter 2.1)

### Ordering Information

#### > VKA 8 SCM

- 1 organiser with 28 slots

- Trays have to be ordered separately

Ref. No.

N501561A

### 2.19 3M™ Connection Boxes

#### Description - MDUO 12 Demarcation Box

12 connections using SC/APC or SC/PC connectors.

#### Product composition

- One BD3000/T2B box with hinged cover
- One 7 slot organiser type BPEO Evolution
- One hinged support plate 12 SC/PC or SC/APC couplings
- One cable strain relief anchor
- One buffer storage section for 24 pigtailed

#### Pre-wiring

- MDUO 12 boxes are pre-wired in the 3M factory with :
  - Evolution trays inserted in the organiser and labelled
  - SC/PC or SC/APC couplings
  - SC/PC or SC/APC pigtailed with label flags
  - Pre-connectorised splitters for PON Application

#### Technical Specifications

##### Dimensions

- Height: 400 mm
- Width: 255 mm
- Depth: 86 mm

##### Protection Performance

- IP 55 and IK 06

##### Dielectric strength for installation on an electrical support

- More than 4 kV

##### Fixing

- Wall mount - 4 x M6 screws
- Metal band (20 x 0.7 mm)
- On a metal frame

##### Colour

- Cover - Light grey RAL 7035
- Box - Dark grey RAL 7037

##### Material

- Thermoplastic and metal
- Flammability rating: UL94 (V0 at 1.5 mm)

##### Cable Anchoring

- On strain relief bar with cable ties

##### Security

- May be pre-installed by the 3M factory
- A ¼ turn triangle lock N691022A
- One lock with key (consult 3M)

##### Connection

- 7 slot organiser with the complete range of Evolution splice trays.
- Maximum capacity: 84 fusion splices

##### Couplings

- As standard, SC/APC is supplied

##### Passive Splitters

- As standard, PLC splitters with 250µm tails or pre-connectorised with SC/APC.

## 2.19 3M™ Connection Boxes

### Description - Interface Box MDUO 24

24 connections on SC/PC or SC/APC connectors.

#### Product Composition

- One BD3000 T2M box with hinged cover
- One 12 slot organiser model BPEO Evolution
- One hinged support plate for 24 SC or SC/APC couplings
- One strain relief bar for cables
- One buffer storage device for 30 pigtails

#### Prewiring

- The MDUO 24 boxes are prewired in the 3M factory with:
  - Evolution trays mounted and labelled
  - SC or SC/APC couplings
  - SC or SC/APC labelled pigtails
  - Bare fibres splitters or pre-connectorised for PON application

### Technical Specifications

#### Dimensions

- Height: 400 mm
- Width: 255 mm
- Depth: 116 mm

#### Protection Performance

- IP 55 and IK 06

#### Dielectric strength for installation on an electrical support

- Better than 4 kV

#### Fixing

- Wall mount - 4 x M6 screws
- Metal band (20 x 0.7 mm)
- On a metal frame

#### Colour:

- Cover - Light grey RAL 7035
- Box - Dark grey RAL 7037

#### Material:

- Thermoplastic and metal

#### Cable Anchoring

- On strain relief bar with cable ties

#### Security

- May be pre-installed by the 3M factory
- A ¼ turn triangle lock N691022A
- One lock with key (consult 3M)

#### Connection

- 12 slot organiser with the complete range of BPEO Evolution splice trays.
- Maximum capacity: 144 fusion splices

#### Couplings

- As standard, SC/APC is supplied

#### Passive Splitters

- As standard, PLC splitters with 250µm tails or pre-connectorised with SC/APC

### 2.19 3M™ Connection Boxes

#### MDUO 12 & 24

- MDUO 12 & 24 boxes are prepared in the 3M factory in different prewiring configurations.
- This table gives the options to define the right configuration (additional configurations on demand)

#### A - Box capacity

- Number of connectors: define the number of couplings installed on the connector support  
MDUO 12 : from 6 to 12  
MDUO 24 : from 5 to 24
- Type of couplings SC/APC

#### B - Network wiring side for point to point configuration

- Number of pigtails
- Type of coupling: SC/PC single mode or SC/APC
- Type of tray: for 12 fusion splices or 12 Fibrlok mechanical splices 2540G
- Number of trays: used for the network side

#### Or Network wiring side for PON configuration (i.e. with splitters)

- Number of splitters: PLC type
- Type of splitter: 1x2, 1x4, 1x8, 1x16
- Number of trays: splitter trays
- Type of tray: 1 slot for 9 fusion splices and 1 PLC splitter  
2 slots for 12 fusion splices and 1 PLC splitter
- Type of termination on incoming fibre: 250µm fibre or preconnectorised
- Type of couplings: SC/PC or SC/APC
- Type of termination on outgoing fibre: 250µm fibre or preconnectorised
- Type of couplings: SC/PC or SC/APC

#### C - Building wiring side

- Number of pigtails
- Type of coupling: SC/PC single mode or SC/APC
- Type of tray: for 12 fusion splices or 12 Fibrlok mechanical splices 2540G
- Number of trays: used for the building side

#### Preparation

- All the links are labelled
- The pigtail connections or network side splitters are placed in the buffer storage device
- The building network side pigtails are installed into the couplings
- All the pigtail terminations and splitter terminations are labelled

The configuration is on demand, please contact 3M.

**Note: the MDUO product lines have been also designed with LC couplings plates.  
Please contact 3M to get stock numbers**

## 2.19 3M™ Connection Boxes

### Description - MDUO 48 Interface Box

48 connections on SC/PC or SC/APC connectors.

#### Product Composition

- One BD3000/T2H box with hinged cover
- One 12 slot organiser model BPEO Evolution
- One hinged support plate for 48 SC or SC/APC couplings
- One strain relief bar for cables
- One buffer storage device for 30 pigtails

#### Pre-wiring

- The MDUO 48 boxes are pre-wired in the 3M factory with:
  - Evolution trays mounted and labelled
  - SC or SC/APC couplings
  - SC or SC/APC labelled pigtails
  - Bare fibre splitters or pre-connectorised for PON application

### Technical Specifications

#### Dimensions

- Height: 400 mm
- Width: 255 mm
- Depth: 146 mm

#### Protection Performance

- IP 55 and IK 06

#### Dielectric strength for installation on an electrical support

- Better than 4 kV

#### Fixing

- Wall mount - 4 x M6 screws
- Metal band (20 x 0.7 mm)
- On a metal frame

#### Colour:

- Cover - Light grey RAL 7035
- Box - Dark grey RAL 7037

#### Material:

- Thermoplastic and metal

#### Cable Anchoring

- On strain relief bar with cable ties

#### Security

- May be pre-installed by the 3M factory
- A ¼ turn triangle lock N691022A
- One lock with key (consult 3M)

#### Connection

- 12 slot organiser with the complete range of Evolution splice trays.
- Maximum capacity: 144 fusion splices

#### Couplings

- As standard, SC/APC is supplied

#### Passive Splitters

- As standard, PLC splitters with 250µm tails or pre-connectorised with SC/APC

### 2.19 3M™ Connection Boxes

#### MDUO 48

- MDUO 48 boxes are prepared in the 3M factory in different pre-wiring configurations.
- This table gives the options to define the right configuration (additional configurations on demand)

#### A - Box capacity

- Number of connectors: define the number of couplings installed on the connector support  
MDUO 48 : from 5 to 48
- Type of couplings SC/APC

#### B - Network wiring side for point to point configuration

- Number of pigtails
- Type of coupling: SC/PC single mode or SC/APC (for LC/APC please consult 3M)
- Type of tray: for 12 fusion splices or 12 Fibrlok mechanical splices 2540G
- Number of trays: used for the network side

#### Or Network wiring side for PON configuration (i.e. with splitters)

- Number of splitters: PLC type
- Type of splitter: 1x2, 1x4, 1x8, 1x16
- Number of trays: splitter trays
- Type of tray: 1 slot for 9 fusion splices and 1 PLC splitter  
2 slots for 12 fusion splices and 1 PLC splitter
- Type of termination on incoming fibre: 250µm fibre or pre-connectorized
- Type of couplings: SC/PC or SC/APC (for LC/APC please consult 3M)
- Type of termination on outgoing fibre: 250µm fibre or pre-connectorized
- Type of couplings: SC/PC or SC/APC (for LC/APC please consult 3M)

#### C - Building wiring side

- Number of pigtails
- Type of coupling: SC/PC single mode or SC/APC (for LC/APC please consult 3M)
- Type of tray: for 12 fusion splices or 12 Fibrlok mechanical splices 2540G
- Number of trays: used for the building side

#### Preparation

- All the links are labelled
- The pigtail connections or network side splitters are placed in the buffer storage device
- The building network side pigtails are installed into the couplings
- All the pigtail terminations and splitter terminations are labelled

The configuration is on demand, please contact 3M.

## 2.20 3M™ 19" MODF 2K Distribution Frame

### 3M MODF 2K/19" – Modular technology for 19" subracks

With its modular optical fibre technology, 3M offers the user a complete system for central optical fibre distribution frames with high fibre counts. Possible applications are centrally located FO main distribution frames for network providers or Fibre To The Desk cabling (FTTD) with single-level hierarchy.

Taking into account the specific characteristics of fibre optics, both applications require a compact and accessible solution for the termination of optical fibres. Furthermore, the system must guarantee trouble-free extension and no downtime maintenance. 3M's 2K modular technology provides the user with an extremely compact FO patching or splicing system which, as a patch distribution frame, offers a capacity of up to 144 fibres on three height units. If used as a splice distribution frame, the capacity increases to 288 fibres per 19" subrack.

The patch system's core is the 2K connector module, also available for various FO connector types. All connector modules are installed in 19" subracks and are easily accessible from the front. The 2K modular system is completed by an excess fibre tray to accommodate incoming bunched fibre reserves, a patch panel for lateral exit of patch cords and a cable management system for 19" cabinets.

### Specifications

- Complete system for optical fibre distribution frames
- Extremely high capacity, per subrack:
  - 144 fibres when used as patch distribution frame, or
  - 288 fibres when used as splice distribution frame per subrack
- Extremely easy to install and maintain
- Expandable any time
- Co-ordinated patch cord routing, observance of minimum bending radius
- Orderly storage of excess fibre
- 2K connector modules for SC/APC, SC, FC and ST technology

### 2.20 3M™ 19" MODF 2K Distribution Frame

#### Description - 3M MODF Components

#### 2K Connector module

2K connector modules (7 distance units) for 10 or 12 connectors each and FO pigtails, type E2000, SC, FC, and ST with printed port identification. The primary coat of the pigtails is offset, all pigtail ends are colour-coded.

Each 19" subrack can house up to twelve 2K connector modules. Splicing reserves and excess lengths of pigtails are stored in two separate cassettes to simplify installation.

#### 2K splice module

FO splicing module (7 DU) for the creation of high-capacity splice distribution frames.

A 2K splicing module permits the inclusion of up to 24 splice connections in two FO splicing cassettes.

#### FO 19" subrack

Subrack (84 DU, 3 HU) to accommodate up to twelve 2K connector or splice modules (7 DU) or dummy panels.

#### FO 19" excess fibre tray

Excess fibre tray (1 HU) for easy storage of bunched fibre reserves of incoming or outgoing FO cables. The excess fibre tray is installed below the 19" subrack and can be pulled out towards the rear during installation work.

#### FO 19" patch panel

Patch panel for lateral exit of patch cords, observing the minimum bending radius.

Rotating radius limiters enable different routing directions. The patch panel is installed in front of the excess tray.

# Volition™ Intelligent Management System

The 3M Volition™ Intelligent Management System (VIMS) offers an extensive range of comprehensive solutions for enterprise cabling needs, supporting the fastest possible throughput, streamlining cabling installation and maintenance and enhancing network continuity. The products maximise control of the entire data network.

Volition Intelligent Management System is an infrastructure management solution delivering quality, reliability, and ease of installation no matter how large or complex the project is.

The system includes a broad range of options for every component – shielded and unshielded copper cabling, as well as fibre optic cabling supporting LC and MPO connectors.

The 3M Volition Intelligent Management System successfully addresses many complex network challenges. Its capabilities include:

- Real-time monitoring of connectivity
- Asset management
- Real-time fault management
- Minimising planning, installation and maintenance time
- 100% accurate documentation
- Personalised management capabilities

Using 3M Volition, network managers are able to manage cabinets and devices much more effectively.

## 3.1 VIMS Patch Panels

### Description - Patch Panels

Volition IMS uses 3M copper or fibre jacks as part of the intelligent management system connectivity. Copper panels are available in either shielded or unshielded version to take any of the 3M K series Category 6 or Category 6A jacks. These panels have all the advantages of standard 3M K series panels including simple assembly and installation. Fibre panels are available with 24 duplex LC adapters either in singlemode, multimode OM3/OM4. The panels have a sliding tray for easy access to the fibres and will accommodate both direct termination using the Hot Melt or No Polish Connector or splicing using Fibrlok or fusion splicing. Modular LC panels with MPO connectivity are also available for use with preterminated MPO backbones. Both copper and fibre connectivity uses standard 3M cable.

### Features

- 24 intelligent copper or fibre ports in 1U
- Copper Jacks may be terminated and snapped into the panel
- Fibre connectors may be directly terminated or spliced
- Modular LC/ MPO connectivity system available
- Cable management bar for copper, slack storage for fibre
- Available in UTP or STP for copper and in singlemode or multimode OM3/OM4 for fibre

### Benefits

- High density, economical choice in space allocation
- Easy for termination and re-entry
- Can be used with preterminated systems
- Good strain relief and protection for terminations
- Solution for all connector choices

## 3.2 VIMS Patch Cords

### Description - Patch Cords

Volition IMS uses patchcords which contain an extra wire to give the connectivity required for the intelligent management. In this way the data circuits are not compromised. Patchcords are available in a variety of lengths and connector types to match the patch panels and cabling types. The patchcords have flexible boots for enhanced life and reliability.

### Features

- Flexible boots
- LSOH jacket
- Available in a range of cable types and lengths

### Benefits

- Enhanced lifetime and flexibility – control of bending
- Suitable for indoor use
- Match 3M connectivity range and current applications.

### 3.3 VIMS Hardware

#### Description - Hardware

The VIMS management hardware controls the scanning of the panel connectivity and processes the results to present to the management software. It collects, saves, and transmits connectivity data from the Volition™ Scanners via the Volition™ Expanders and updates the management station. The arrangement of the hardware allows the managed system to grow within and across buildings and locations.

#### Features

- Real time collection of data from copper or fibre connectivity
- Can collect data from many comms rooms within or between building and networks
- Interfaces with IP enabled equipment

#### Benefits

- Asset and connectivity tracking in real time. Aids moves, adds and changes
- Able to be used in medium to very large systems
- Aids asset tracking, moves, adds and changes  
Gives enhanced network security

## 3.4 VIMS Software

### Description - Software

Volition™ IMS Software manages Volition™ hardware, monitors the health of all the cabling components and also collects network data using its own discovery mechanism as well as data from external applications.

Volition IMS can be deployed in centralised or distributed configurations and can manage sites locally and remotely.

Using this 100% accurate data, it builds and maintains a database, a trusted source of information on all network components and their connectivity to other network components.

It immediately identifies disconnected devices and users, enabling proactive network troubleshooting and reducing mean-time-to-repair (MTTR).

Building on this accurate data, Volition IMS automates and accelerates a broad variety of previously manual tasks, including automated provisioning, work order planning and execution,

reporting capabilities, production and management, guided moves, adds and changes (MAC) and maintenance forensics, web-based configuration, connection troubleshooting, security monitoring, utilisation optimisation and others.

### Key Capabilities

#### Documentation & Compliance

- Provides a trusted source database for infrastructure and network assets
- Generates reports to document assets and operations
- Supports compliance with security and privacy legislation

#### Automated Provisioning

- Supports a 100%-automated and accurate provisioning process
- Provides control over power and space consumption for the datacenter environment
- Supports the user-specific policies

#### Incident Management

- Provides real-time alerts and effective troubleshooting tools

#### Asset Management

- Automatically discovers IP-driven devices in the organization
- Optimizes the management and utilization of all network assets

#### Security

- Helps mitigate security risks. Offers a range of advanced security features

### VIMS software contains the following features

#### Work Order

- Created by the system manager and used to assign and track different tasks issued to the customer's technicians. These tasks can vary from creating and editing links to installing software and relocating terminal equipment, for example, telephones, printers etc.

#### Secure Link

- Allows vital links in the organisation to be defined. Closely monitors information on any change or problems that occur on the secure link or on its end devices (stations).

#### VIMS hardware support

- With the collaboration with VIMS Hardware, the application provides real time accurate management of the VIMS Cabling System.

## 3.4 VIMS Software

### Ordering Information

The VIMS software is the basis of three packages. Additional modules may be purchased to complement the package to build the software suite required for a particular application.

# Copper Interconnect Solutions

Our Copper Interconnect Solutions include an extensive line of insulation displacement connector (IDC) products for voice and data applications and a comprehensive portfolio of complementary accessories including mounting frames, distribution boxes and installation tooling.

All the products in the Copper Interconnect Solutions range have gained industry acceptance and recognition for consistent performance and ease of termination.

## 4.1 Connection Blocks

### Description - Category 6 RCP

#### RCP - Category 6 punch down blocks

In a cabling system, connection by modules generally offers greater flexibility at the patching level for both voice and data applications.

The RCP range consists of a range of shielded and technical modules which are designed to be used within high data rate applications.

Technical modules enable a fast installation of interfaces between cables with various characteristics (for example a single cable with a RJ45 modular jack).

The interchangeable technical modules are fitted with removable electronic boards

allowing for a complete solution for protection, display, adaptation, etc. In case of maintenance the electronic board can be replaced without removal of the connection module.

The range of shielded RCP 2000 modules guarantees shielding efficiency from one end of the connection chain to the other and permits considerable reduction of the effects of electromagnetic interference.

The cable management uses label holders and colour codes for easier identification.

#### Specifications

- faster cabling with time saving estimated at 20%
- net improvement in transmission performance above 100 MHz
- different solutions for numerous interfaces
- twisted pair on D-Sub, coax, RJ45
- line and error monitoring
- world-wide IDC technique
- compact design
- category 6

## 4.1 Connection Blocks

### Ordering Information

#### RCP Category 6 – Cabling Modules

##### > Shielded rear-cable modules

with metal cover. Protects against conducted and radiated electromagnetic interference. Single-wire and multi-wire cables can be connected to either the upper or lower contacts. Equipped with a bonding comb, bonding strip, a channelled wire guide (with the lower half metallised) and a metal cover on the upper half. Requires shielded cords. 8 pair disconnection module.

|        | Ref. No. |

| Green  | P46839DA |

## 4.1 Connection Blocks

### Description - RCP 2000

#### RCP - Technical Modules

Essential complement to the RCP 2000 connection modules, the technical module range permits the protection of equipment lines, Ethernet computer networks, additional functions for PABX's and also provides connection interfaces with active elements in the network.

#### Specifications

- Series protection limiting transient voltage surges
- Double deck protection with 3-pole surge arrestor and transyl or varistor
- Earthing through the rail
- Maintains constant voltage at equipment terminals
- Nominal current of 300mA
- Fuses reset automatically
- 2 step modules

#### Ordering Information

##### > Telephone and special links protection module

For telephony applications (4 pair). Working Voltage (V): 48/90 AC/DC. Bandwidth: 5MHz. Ability to handle (8/20  $\mu$ s spike): 10 shocks 5kA. Limiting voltage in common mode:

- 0.5/700  $\mu$ s spike 6kV: 200V
- 8/20  $\mu$ s spike 5kA: 250V

Ref. No.

P45922AA

##### > Bipole module, protection and viewing 2 pairs (lines)

All 3 functions available for 2 lines. Mounts directly on network lines. Meets TCI requirements. Working Voltage (V): 48/90 AC/DC. Bandwidth: 5MHz. Ability to handle (8/20  $\mu$ s spike): 10 shocks 5kA. Limiting voltage in common mode:

- 0.5/700  $\mu$ s spike 6kV: 200V
- 8/20  $\mu$ s spike 5kA: 250V

Ref. No.

P45975AA

##### > Module for 4 fuses

Accommodates cylindrical fuses 5 x 20 mm 100mA fuses supplied. pair / pair protection against overcurrents.

- Disconnection IDC
- Colour: Red

Ref. No.

P45941AA

## 4.1 Connection Blocks

### Ordering Information

> **Line re-routing module**

Re-routes 2 units directly to telephone network in case of PABX power failure. Equipped with 4 RT relays that permit the use of any telephone in the system.

> **48V version**

Ref. No.

**P45370AA**

> **1-pair cord for 2 and 4 wire ELS**

Ref. No.

**P44927AA**

**SUB D**

Interface ID connector, patching with plug or cord/connector  
Supplied with 10 contacts crimped to wires

- Colour: yellow

> **9-pin Sub D male**

Ref. No.

**P45632AA**

> **9-pin Sub D pins female**

**P45633AA**

> **25-pin Sub D pins female**

**P45629AA**

**9-pin modular jack connector ISO 8877**

With automatic shielding continuity on the profile, providing an interface between the active equipment that has an RJ45 and the distributor frame

> **4 modular jacks for Ethernet 100 Base Tx SCQ cabling, ivory**

Ref. No.

**P45362A5**

> **2 modular jacks RJ45 SCQ cabling, ivory**

**P45368A5**

> **BCS 2 Cabling, yellow**

**P45363AA**

**Quadruple Baluns**

Permits the connection of pairs to coax RG 62 AU for IBM Type 3278 terminals

> **9-pin Sub D male**

Ref. No.

**P45400AA**

## 4.1 Connection Blocks

### Ordering Information

#### RCP Accessories

> **19" Rack**

Subrack for 26 vertical mounting, 16 mm pitch modules. When mounted within a 19" rack, cabinet or wall mounted box the modules are recessed in relation to the front face of the mounting uprights. Mounting screws supplied.

Ref. No.

**P33040AA0000**

**Multi termination tool, scissor action, colour blue**

> for IDC systems STG, STG 2000; STC,STR, RCP, RCP 2000, BRCP, RIM, RCAF, Infra+, ID 3000, Trucco, System 71, S5000, 2810

> for IDC systems STG, STG 2000; STC,STR, RCP, RCP 2000, BRCP, RIM, RCAF, Infra+, ID 3000, System 71, S5000, LSA PLUS, 2810

> for IDC systems STG, STG 2000; STC,STR, RCP, RCP 2000, BRCP, RIM, RCAF, Infra+, ID 3000, System 71, S5000, LSA PLUS, SID, 2810

Ref. No.

**C234056A**

**C234058A**

**C234062A**

> **Label holder - 8 pair**

Attached directly to the mounting profile. Colour light grey

Ref. No.

**P44223AA0000**

> **Rotating Label holder - 8 pair**

Attached to the modules it prevents the attachment of patching wires. Colour light grey

Ref. No.

**P44506AA0000**

> **Patching Cord Metal shells SFTP cable**

connected 360° to the braid or the screen Straight cabling LSOH Sheath, 1m

Ref. No.

**P39135A50000**

A comprehensive range of accessories is available - please ask for further details

## 4.1 Connection Blocks

### Description - BSTG / STG overview

#### STG 2000 blocks

The BSTG block with STG 2000 modules is a modular cat.5 transmission performance MDF solution. Suitable for line side and exchange side the BSTG blocks (with a pitch of 16mm) is the highest density system on the market.

1600 pair can be installed on a 2,6 m vertical.

A comprehensive range of single pair or multipair protection is available.

### Specifications

- Cat. 5 transmission performance
- High density
- Very compact system
- 0,4 - 0,8 mm wire diameter

#### STG 2000 modules: cat. 5 transmission performance as standard

These modules can be used in any modern network and are fully compatible with applications such as xDSL or Pair gain. Suitable for high-density applications STG2000 is available in two different mounting options:

- Mounting on our standard backmount frame.
- Mounting on both the standard and the QSA backmount frame.

The system offers connection and disconnection modules as well as switching modules in 8 and 10 pair version.

Protection can be provided by single pair protection or multipair facility.

### Specifications

- Cat. 5 as standard
- 0,4 - 0,8mm wire diameter
- Pitch of 16 mm
- Comprehensive range of circuits and accessories

## 4.1 Connection Blocks

### Description - 3M™ STG 2000 overview

#### STG 2000 modules

STG 2000 is the latest evolution of STG range of connection modules. This module offers category 5 transmission performance as a standard. As a result this module can be used in any modern network and is fully compatible with all kind of applications (xDSL, Pair gain...). Termination is easy, cables and jumpers can be managed from the rear or from the side.

#### Reliability and performance straight IDC technology offers outstanding performances:

- Multiple reterminations with conductor gauges in the 0,4 mm to 0,8 mm range
- Improved wire retention (in all directions)
- Gas-tight connection area - corrosion proof
- Tin-lead plating on contacts prevents corrosion
- Transmission performances meet cat 5 (100 MHz)
- 2 wires can be accommodated in the same slot
- Very compact connection module
- Specific contacts for stranded wires upon request.

#### Application in network

- Suitable for high-density installation (2400 pair single sided cross connection cabinets, 1600 pairs on 2,6 metre vertical MDF, containerised exchanges...)
- STG 2000 modules are suitable for public telephony (MDF, cross connection cabinets, building distribution) as well as for private telephony and high data rates transmission.

#### Specifications

- Category 5 as a standard
- Very compact size (16 mm pitch)
- 0,4 - 0,8 mm wires
- Optional IDC for stranded wires (on request)
- Specific module with rear cable termination
- Multiple reterminations
- Comprehensive range of protection circuits and accessories

## 4.1 Connection Blocks

### Description - 3M™ STG 2000 system

#### STG 2000 protection solutions

Protection solutions for STG are composed of multi pair protection magazines as well as of a complete range of single pair protection plugs.

##### Protection magazine

Front facing magazines suitable for all IDC STG connection modules and BSTG modular blocks, with the relevant protection facilities.

Automatic earthing through the backmount frame - 5 kA drain current capacity.

Magazine with earth cord for upgrading standard connection modules or blocks with protection.

##### Single pair protection plugs

This range of single pair protection modules is designed to increase flexibility in network management (protection can be removed separately only on faulty lines).

Wide range of protection circuits is available, from standard overvoltage protection, to overvoltage and current protection, up to fast 5 pole protection. A disconnection access on the protection plugs allows using all STG disconnection and test accessories without removing protection.

1 circuit = 1 colour

Single pair protection modules are suitable for the standard 16 mm pitch.

### Specifications

- Comprehensive range of protection
- Compact design
- Fast 5 pole protection
- Automatic earthing

## 4.1 Connection Blocks

### Description - 3M™ SID overview

#### SID-C High density system

SID-C connection and disconnection modules (8 and 10 pair) for mounting on individual profile FlexiRail and backmount frame SID-C are available in the following different types:

- Connection module 8 and 10 pair, printing black
- Disconnection module 8 and 10 pair, printing green.

Both types can be protected with primary overvoltage protection magazines or 1 pair Single Pair Protection plugs (SPP).

- Earthing modules, printing red for 40 wires

#### SID-CT Compact top model for all standard backmount frames

The modified fixing system offers the possibility to use all standard backmount frames with only one type of module.

Therefore SID-C backmount frames with a pitch of 17,5 mm, as well as, LSA PLUS\* / QSA backmount frames with a pitch of 22,5 mm are suitable for the SID-CT module. Due to the slim design of the module SID-CT offers nearly twice as much jumpering space between two modules.

SID-CT can also be used on the individual profile system - FlexiRail. Individual movement on the profile guarantees a maximum of flexibility by optimised handling. Due to the click-on system, SID-CT can be easily unclamped by hand; no tool is necessary.

#### SID-C abs DDF high transmission performance

Based on the reliable SID technique, the new SID DDF module is designed to offer a cable block solution with a maximum of 80 pair DDF to be terminated and jumpered. With a special construction of the backmount frame it is possible to manage all cable screens.

### Specifications

- Compact system with a pitch of 17,5 mm
- Wire diameters from 0,4 mm to 0,8 mm
- Assembling on SID-C backmount frames and FlexiRail profiles
- Removable by hand without tools
- Fits on SID-C and LSA PLUS\* / QSA backmount frames and on profile system
- FlexiRail
- Pitch of 17,5 mm
- Nearly twice as much jumpering space between the modules when using LSA PLUS\* / QSA backmount frame
- Simple removal by hand without tool
- Comprehensive accessories from SID-C range can be used
- Category 5e transmission performance
- Capacity up to 40 ports
- Application in co-location rooms
- Same connection technology for analogue and high data rate application in colocation rooms
- 8x3 abs contact arrangement
- wire guide channel for cable management

\* LSA PLUS is a trademark of ADC Krone

## 4.1 Connection Blocks

### Description - 3M™ SID overview

#### SID-CD

Screw mounted strips with DIN mounting dimensions for small distribution boxes

SID-CD the handy screw-on solution with DIN mounting dimensions of 96 mm for 8/10 pair or 170 mm for 20 pair. Its main application is in small to medium telecommunications and data distribution boxes. The SID-CD strips are available both as connection and disconnection modules for 8, 10 and 20 pair cables. Earthing strips for 40 and 80 wires made up with two earthing connections each, are fixed at the right and left hand side of the module. A complete range of accessories allows optimum use of the SID-CD system.

#### SID-P

strips for PCB boards

The SID- P product range has been specially designed for applications with printed circuit boards.

#### SID-P/3,81

These items are used in all areas where circuit boards make contact with copper leads, e.g. on patch panels. In combination with its compact design, it guarantees easy connection within the most restricted spaces a considerable advantage in those areas which require connection under restricted ratios, e.g. in outlets.

### Specifications

- One wire per slot 0,4 - 0,8 mm
- 8, 10 and 20 pair modules
- Also available as disconnection strips
- Supplementary earth connection
- World wide approved SID Technology
- Stripping, terminating and cutting in one process
- Compact design
- SID-P can be connected with a 3 mm screwdriver (DIN5264 form A)

## 4.1 Connection Blocks

### Description - 3M™ SID system

With the SID product family 3M is setting the standards for high density IDC termination combined with improved handling. The main applications are in telecommunications and data networks.

The SID insulation displacement contacts are enclosed by the plastic housing of the module. This improves the insulation performance and helps in providing a safe working practice.

The SID product family is available in 8 and 10 pair connection and disconnection modules.

3M's individual mounting systems reflects the trend towards improved handling.

Backmount frames or profile rails are available as required, and also „FlexiRail“ as an individual mounting system for targeted applications.

A significantly increased capacity compared to other techniques is achieved with the compact SID-C module.

A wide range of accessories and a comprehensive overvoltage protection complete the product family.

### Specifications

- High density
- One wire per slot 0,4 - 0,80 mm
- Optimised cable conductor guide
- Long-life tools
- Flexible mounting systems
- Removal without a special tool
- Comprehensive overvoltage protection system

### Cable management

1. Sectional view of SID-C module.

3. Locate insertion tool in a straight position on the module. The printed scissors should face the centre of the module. Push the tool firmly into the slot.

2. Push wires into connection slot. Allow enough of wire to overhang the far side of the module.

4. The clicking sound indicates that the wire is terminated and automatically cut to length in the process.

### Description - 3M™ SID system

#### SID protection for overvoltage solutions

##### Instruction

The SID overvoltage protection magazines are designed for the 8/10 pair SID-C/CT/CD modules for use in telecommunications circuits. Earthing of the overvoltage protection magazine is achieved through the magazine to the back-mount (backmount earth connection). It must be earthed according to local regulations.

The magazine is inserted into the test access contacts. Standard surge arresters are used in the magazines. If necessary fail-safe devices can also be inserted. Dust covers can also be used with magazines installed.

As a result of the SID-system philosophy, SID-SPP makes it possible to individually protect DIN-connections and terminal strips (SID-CD).

The SID-SPP is designed to give protection to the equipment. Testing of the circuit and jumper re-termination can be carried out with the SID-SPP in-situ.

There are three different application specific versions of the SID-SPP, protection concept making it the ideal solution for the most varied in-house and telecom network connection demands.

### Specifications

- one overvoltage protection magazine for 8 or 10 pair modules
- surge arrester with and without fail-safe
- magazines for 3-pole surge arrester
- single pair protection plugs (SPP)

### Ordering Information

#### SID protection for overvoltage solutions

##### > SID-C overvoltage protection magazine for 3-pole surge arrester

- for insertion in 8/10 pair SID modules
- Dimensions (L x W x D): 98 x 17,3 x 31,5 mm incl. cover.
- PU: 10 pcs, Weight: 0,5 kg

##### > SID-C overvoltage protection magazine with 3-pole arrester

- 230V - 2x 5A / 2x 5kA with integrated fail-safe

##### > SID-CT overvoltage protection magazine for 3-pole surge arrester

- for insertion in 8/10 pair SID modules
- Dimensions (L x W x D): 98 x 17,3 x 31,5 mm incl. cover.
- PU: 10 pcs, Weight: 0,5 kg

##### > SID-CD/SID-CP overvoltage protection magazine for 3-pole surge arrester

- for insertion in 8/10 pair SID modules
- Dimensions (L x W x D): 98 x 17,3 x 31,5 mm incl. cover.
- PU: 10 pcs, Weight: 0,5 kg

10 pair connection module

**QSA Series 1**  
20 pair connection module

**QSA Series 2**  
connection/disconnection modules  
100 pair distribution block

### Description - QSA Cross Connect Overview

#### QSA Series 1

Connection modules for screw fixing in small distribution units. The fixing dimensions of the connection modules for 10 or 20 pairs (colour: grey) are 96 or 170 mm according to DIN 47608 (part 1 and 2). The earthing strips (colour: red) for 44 or 84 wires complete the product range.

#### QSA Series 2

Connection and disconnection modules for mounting on back mount frames. The following types of modules are available:

- 10 pair connection modules (colour: grey) for overvoltage protection magazines.
- 10 pair disconnection modules (colour: white) for overvoltage and fine protection.
- Earthing modules (colour: red) for 38 wires.

## 4.1 Connection Blocks

### Description - QSA Cross Connect System

#### Cable terminal blocks series 2

**Cable head block for cabinets with vertical frame. The backmount frames are designed to accommodate either grease filled distribution cables or air pressured main cables with a cast pressure blocking kit. Comes with rear cable entry holes and protective grommet. Cable strength relief is provided with enclosed accessories. Cable designation label and fixing material included.**

#### Delivery content:

- Backmount frames (stainless steel); fitted with:
- 5 or 10 connection or disconnection modules for each 10 pairs, numbered 1 - 0
  - 1 dust cover, flat version for 100 pairs, high version for 50 pairs
  - 1 labelling frame
  - 1 plug-in number set
  - 2 edge protection
  - 1 fixing set for mounting

## 4.2 Patchcords

### Description - CBE patchcords for RCP, RCPT and STG

The CBE family is a range of patchcords for data and telephony cabling systems that have a snap-on system which allows direct connection on to both RCP Category 6A, RCP 2000, RCPT and STG 2000 connection modules. They are available in both shielded and unshielded versions.

The shielded version consists of metal shell with the braid screen in 360° contact with the metal parts providing an efficient drain to earth of any electromagnetic interference. The products are characterised by their optimised transmission performance, easy installation and identification.

2 and 4 pair cords with PVC sheaths are available in both shielded and unshielded versions.

#### Features

- 100 Ohm 2 and 4 pair cables consisting of 7 x 0.15 mm stranded conductors
- Quick and easy installation
- Available in shielded and unshielded versions
- Mixed CBE/RJ45 patch cords available for connection to equipment
- Attenuation @ 100 MHz - 29 dB/m
- Cross talk @100MHz - 35 dB

### 4.3 Frames, cabinets

#### Description - Small capacity 3M™ MRE / CIPE

A comprehensive range of wall mount frames for STG and RCP DDF connection modules. Suitable for both rear, side or mixed cabling (Rear cabling method or flat cabling method).

These frames can be delivered CKD and are manufactured using corrosion proof materials. A complete range of covers are also available which offer a further degree of protection. Suitable for all STG accessories and protection solutions (earth post).

CKD = Completely Knocked Down.

#### Specifications

- From 300 to 400 pair
- High density (16 mm pitch)
- Wide range
- CKD configuration
- Flat wall mount version (MRE)

## 4.3 Frames, cabinets

## 4.3 Frames, cabinets

### Description - Small capacity 3M™ QVG

The 3M distribution frame QVG is of use wherever a number of telecommunication components have to be clearly and practically mounted and connected in back mount frame, block, profile and DIN designs.

The 3M distribution frame, QVG, is a modular design using mounting rails, QRS, and wall mounting sets.

#### Mounting rail set QRS

Contains the mounting rail, wire guide ring for 1000 pairs for horizontal jumpers, a wire guide rail and wire guide rings for the vertical jumpers, plus system-related mounting material.

The mounting rail is available in three sizes - 700, 1000 and 1600 mm. The wire guide ring for 1000 pairs is locked onto the tail piece of the mounting rail. By locking a further wire guide ring onto the first, a second horizontal jumper level is added.

The design of the distribution frame allows the cable and jumper levels to be separated.

It is also possible to mount a cable channel (see order examples) and secure cables to the wire guide rail. In order to connect telecommunication components (except in back mount frames), the wire guide rings are attached to the mounting rail.

When using back mount frames (e.g. SID-C), the wire guide rings are mounted on the wire guide rail simply by re-plugging them. An additional wire guide rail can be added (see order examples). Three distribution frames are available: QVG 700, QVG 1000 and QVG 1600

#### Wall mounting rail set

Required for mounting the QRS. This contains two wall mounting rails with four tail-pieces plus mounting material. The tail-pieces serve for mounting the wall mounting rails to the wall, and, at the same time, provides an opportunity for bridgeless additions. The spaces between the mounting rails have various adjustments by using slide nuts. Cables are clamped via cable ties or hoop clamps (aperture width 16 mm).

#### Two lengths are available:

- 550 mm for 2 QRS
- 750 mm for 3 QRS

#### Material

- Mounting rail set: stainless steel, diecast zinc
- Wall mounting rail set: sheet steel, chromed
- Synthetic parts: PA.

## 4.4 Building Distribution

### Description - Connectors for distribution boxes 3M™ STS

- Connection strips with insulation displacement contacts (IDC) designed for screw mounting to a flat base (wall, box, channel).
- These strips can be screw fitted to any level surface and require no back mount profile or special support.
- The full range of modules comprises the following:
  - Disconnection module (STS C2)
  - STS modules are compatible with all STG accessories
  - To be upgraded with protection STS modules have to be equipped with multipair protection magazines with cord. (Refer to STG protection solutions)
- Extremely compact design 14 mm
  - insulated body in self-extinguishing polycarbonate (V0 rating to standard UL 94).

#### Distance between holes

5 pairs: 45 mm  
10 pairs: 120 mm

### Specifications

- Category 5
- Compact 14 mm pitch
- 5 and 10 pairs
- 0,4 to 0,8 mm wires

### Ordering Information

## 4.4 Building Distribution

### Description - Building distribution boxes 3M™ VKK overview

#### 3M VKK distribution boxes for 10 - 20 pair SID-CD

VKK distribution boxes for 10 and 20-pair, are a range of empty plastic boxes for use in surface mount indoor applications. Their primary use is for the mounting of SID-CD or DIN connection strips in 'dry room' environments.

Manufactured from thermoplastic synthetic material (ABS) the boxes offer a high degree of impact resistance. Knockouts are provided on all sides of the cover and within the base plate to provide cable inlets / outlets.

Each box is supplied complete with screws for the mounting of component parts. Maximum allowable height of internal components is 38 mm.

**Protection Rating:** IP31 (EN 60529)  
**Colour:** RAL 7032, Pebble grey  
**Material:** ABS

#### Possible Configurations

##### VKK 1

- 1 component part, hole-spacing 96 mm (e.g. 10-pair connection strip SID-CD or type A\*)

##### VKK 2

- 1 component part, hole-spacing 170 mm (e.g. 20-pair connection strip SID-CD/10, 20-pair type B\*)

##### VKK 3

- 2 component parts, hole-spacing 170 mm (e.g. 20-pair connection strip SID-CD/10, 20-pair type B\*)

#### 3M VKK distribution boxes for 20 - 40 pair SID-CD

VKK distribution boxes for 20 and 40-pair, are a range of empty plastic boxes for use in surface mount indoor applications. Their primary use is for the mounting of SID-CD or DIN connection strips in 'dry room' environments.

Manufactured from thermoplastic synthetic material (ABS) the boxes offer a high degree of impact resistance. Knockouts are provided on all sides of the screw-on cover and within the base plate to provide cable inlets / outlets.

Each box is supplied complete with screws for the mounting of component parts, wire guide hooks and cable tie holders. Maximum allowable height of internal components is 38 mm.

**Protection Rating:** IP31 (EN 60529)  
**Colour:** RAL 7032, Pebble grey  
**Material:** ABS

#### Possible Configurations

##### K10/20

- 2 component parts, hole-spacing 96 mm (2 x 10-pair connection strips SID-CD)

##### K10/40

- 4 component parts, hole-spacing 96 mm (4 x 10-pair connection strips SID-CD)

\*) Connection strip according to DIN 47614

## 4.4 Building Distribution

### Description - Building distribution boxes 3M™ VKA 3K

#### 3M Distribution box for 100 pair SID-CD

The VKA 3K distribution box is a surface mount empty housing for mounting connection strips in a 'dry room' environment.

Manufactured in thermoplastic synthetic material (ABS) the housing offers both high impact and flame resistance.

Each housing includes a screw-on cover and baseplate that include 5 slide in plates with contoured knockouts, (3 in the top and 2 in the bottom). Cable strain relief is also provided at the cable inlet areas.

**Protection Rating:** IP31 (EN 60529)  
**Colour:** RAL 7032, Pebble grey  
**Material:** ABS

#### Possible Configurations

- Connection strips (hole-spacing 96 mm or 170 mm, respectively), 3 pcs. for 10 or 20 pairs each (screwing and soldering connections)
- SID-CD-strips: 5 pcs. for 10 or 20 pairs each (max. 100 pairs)
- Or other components on the baseplate

## 4.4 Building Distribution

### Description - Building distribution boxes 3M™ VKA overview

#### 3M VKA distribution boxes for 60 - 640 pairs

The VKA distribution boxes are designed to accommodate component parts with a mounting measurement of 170 mm (DIN strips), SID-C, SID-CD, as well as overvoltage protection modules.

The distribution boxes are available in four sizes capable of accommodating from 60 to 480 pairs for DIN strips. The SID-C system (depending on the housing size) accommodates a maximum of 80 to 640 pairs (recommended capacity: 480 pairs).

The distinguishing feature of this generation of distribution boxes is the rotating baseplate - "FlexiBase".

FlexiBase allows for flexible mounting: SID-CD strips (DIN design) can be mounted on one side, with a back mount frame or FlexiRail for SID-C integrated on the other side. FlexiRail allows for continuously variable module configuration.

"DIN-SID-C" - based on FlexiBase - is offered for VKA 4, VKA 8 and VKA 12.

"DIN-SID-C" stands for combined DIN and SID-C FlexiRail systems in a single housing.

#### SID-C is optimal where high density is required.

The "DIN" models are suitable for DIN strips (screw and solder connections).

This design concept offers users the possibility to decide between the DIN and frame systems to meet their individual needs for on-site, last-minute installation, without having to buy additional frames. Thanks to the FlexiBase, a quick "turn of the hand" transforms a DIN distributor into a frame distributor for SID-C with FlexiRail.

VKA2 / DIN as well as the «DIN-SID-C» models provide the ultimate solution for

mounting SID-C strips even in DIN format (mounting measurement 170 mm). The strips are simply secured to the baseplate by means of special retaining clips without having to be screwed on which is a distinct assembly advantage. Furthermore, the retaining clips can be simultaneously used as wire guide hooks.

Cables are inserted through plastic caps with knockout contours, which are fastened to VKA 4, VKA 8 and VKA 12 mounting profiles and allow easy cover installation and removal in a mounted distribution box.

The distribution boxes are standard equipped with snap locks.

Safety locks are a retrofit option.

## 4.4 Building Distribution

### Technical Specifications

#### Models

VKA 2 / DIN: Baseplate for DIN component parts  
 VKA 2 / SID-C: Baseplate with integrated SID-C FlexiRail

#### VKA 4, VKA 8 and VKA 12 in the following versions

DIN: With baseplate for all DIN component  
 With FlexiBase for SID-CD (DIN strips) and integrated FlexiRail for  
 SID-C

#### Material

Baseplate: Galvanised steel  
 Cover: Powder-coated sheet steel with plastic caps.  
 Lock: Snap lock; lock kits optional.  
 Protection type: IP 40 (EN 60529)

#### Standard equipment

Baseplate with integrated SID-C FlexiRail.  
 Retaining clips / wire guide hooks for DIN models with Flexibase and VKA 2 / DIN;  
 wire guide hooks for SID models;  
 ground terminals.

## 4.4 Building Distribution

### Description - Building distribution boxes 3M™ VKU

#### 3M VKU flush mounted distribution boxes

VKU distribution boxes are a range of housings designed for flush mount applications.

Available in various materials and sizes to suit individual requirements.

#### VKU 2 to 8

Housing: Sheet steel, coated with stove-enamel.

Colour: RAL 7032, pebble-grey.

Cable insertion: Plastic inserts with knockout contours.

Lock: Catch type lock; safety lock as accessory.

Protection rating: IP 42 (EN 60529), depending on component specifications.

Max. allowable height of fitted component parts:

33...58 mm (depending on underplaster depth).

#### Standard equipment

- Flush-mounting box with plastic inserts
- ground terminals, fastening bars
- wire guide rings
- plaster compensation frame and door with designation cards and fasteners
- Screws for fastening connection strips.

## 4.4 Building Distribution

### Description - Building distribution boxes 3M™ VKU 1/20, VKU 1/40

#### 3M VKU 1/20

##### Housing, frame and cover

Thermoplastic synthetic material (ABS), impact-resistant.

Colour: RAL 1013, pearl-white.

Perforated sheet base: Steel, chromed.

Cable insertion: Knockout markings on all sides of the flush-mounting box.

Protection rating: IP 31 (EN 60529).

##### Standard equipment

- Flush-mounting box with perforated sheet base for installing component parts with self-tapping screws.
- Plaster compensation frame (adjustable to max. 10 mm) with cover insert.

##### Optional configuration

1 connection strip, mounting measurement 96 mm (2 fitting angles with screws to be ordered separately).

#### 3M VKU 1/40

##### Housing, frame and cover

Sheet steel, stove-enamel finish.

Colour: RAL 7032, pebble-grey.

Cable insert: flush-mounting box with plastic elements inserted above and below and knockout markings left and right.

Protection rating: IP 31 (EN 60529).

##### Standard equipment

- Flush-mounting box with perforated sheet base for mounting component parts with self-tapping screws.
- 4 fitting angles with screws
- 2 clamps for ground lead
- Plaster compensation frame (adjustable to max. 12 mm)
- Cover with sash lock
- Slide-in inside inscription plate

##### Optional configuration

Max. 2 connection strips, fitting measurement 96 mm.

## 4.4 Building Distribution

### Description - Building distribution boxes 3M™ STB, 3M™ STF

#### 3M STB - 3M STF indoor distribution boxes

The range of indoor distribution boxes is composed of complete boxes with connection modules (STB) and boxes to be equipped with STG connection modules (STF).

These boxes are suitable for all indoor applications and the cover can be removed from the base with 1/4 turn captive screws. Built in impact resistance polystyrene the protection class is IP 41, standard colour is RAL 9001 (cracked white). The box is designed to be mounted with 4 screws (not supplied).

On STF boxes and STB (30, 40, 50 pairs) each side of the box is made up of a sliding panel which can be removed. This allows for several boxes to be installed side by side with jumpers routed from one box to the other. A valuable feature when extending the number of lines in an installation.

##### STB fully equipped boxes

- STB 10 and 20 pairs:  
Compact boxes with lockable cover, based on STG IDC technology. The multipair cable is routed through the centre of the box with the distribution cables exiting through the side or the rear of the box. A specific high depth cover allows to install multipair protection magazines.
- STB 30, 40 and 50 pairs:  
STF boxes equipped with STS screw mount disconnection modules.

##### STF empty box for STG connection modules

- STF is available in two box sizes, 100 and 200 pairs. Provision is made to mount STG modules on an internal backmount frame with earth post
- The box is delivered complete with cable ties.

### Specifications

- Possibility to install the boxes along each other
- Comprehensive range
- STG connection technology

## 4.4 Building Distribution

### Description - Category 3 Punch Down Patch Panels

- The 3M category 3 punch down panels provide a point of integration of voice grade channels into structured cabling wiring.
- The ergonomic design allows easy installation into a 19" rack. High pair count telephony cables may be terminated into the 19" panel to provide a point of distribution using RJ45 connections.
- The panel is available in 25, 28, 50 or 56 ports.

### Features

- Uses SID punch down
- Allows use of RJ45 for telephony
- Supplied complete with all 19" mounting materials
- 25, 28, 50 or 56 ports in 1HU

### Benefits

- Easy to install
- Allows integration of telephony into the structured wiring
- No need to purchase additional mounting material
- High density wiring minimising required rack space.

### Ordering Information

#### Category 3 RJ45 Panel

- For category 3 transmission
- May be used with multipair cable (50 or 100 pair)
- Cabling using pairs 3/6 and 4/5
- Wire diameter between 0.32 mm to 0.8 mm

- > 25 ports
- > 28 ports
- > 50 ports
- > 56 ports
